IN THE KNOW:
Identifying multiple aspects of Quebec’s community sector
EXECUTIVE SUMMARY

INTRODUCTION

The Centre for Community Organizations (COCo) began the community-based action research project “In the Know: Identifying multiple aspects of Québec’s community sector” in October of 2008 to help develop a better understanding of the diversity of groups working for social change in Québec. The study, funded and supported by the Secretariat à l’Action Communautaire Autonome et aux Initiatives Sociales (SACAIS), aimed to survey English-speaking, bilingual and ethno-cultural community groups across Québec over a 3 year period. The research was carried out between 2009 and 2012.

BACKGROUND

Since its inception in 2000, COCo has identified trends within groups that are part of its network: the “ethno-cultural, bilingual and English-speaking community groups” (Blumel & Ravensbergen, 2011, p. 2). Through its work with approximately 400 groups per year, COCo suspected that these groups are more diverse in their services and programs, less connected to formal networks in Québec and working with less government funding than their francophone counterparts. While not all groups want to be connected to formal networks or government funding, there are those in the COCo network who do. After organizing two forums about government funding, it became obvious to COCo that most groups in their network have little knowledge of SACAIS, Québec government funding or the formal network system that exists among community groups in Québec. Discussions between COCo and SACAIS officials identified the need to more fully document the reality of English-speaking, bilingual and ethno-cultural groups. In the Know has sought to do this.
THE STUDY

Objectives of the research

- Locate Anglophone, bilingual and ethno-cultural community groups in Québec.

- Develop a portrait and understanding of Anglophone, bilingual and ethno-cultural community groups working in Québec.

- Identify the characteristics and patterns that emerge about the recognition of groups by the Québec government, and the types of activities and structures of these groups.

- Advance and test the hypothesis about why these groups are marginalized or excluded.

- Propose strategies to support the recognition and inclusion of these groups in the Francophone community sector.

Methodology: a community-based action research approach

COCo decided that a community-based action research (CBAR) approach would reflect its desire to see changes occur in the relationship between the English-speaking, ethno-cultural and bilingual community groups and the Québec government. CBAR also requires meaningful participant involvement in all phases of the research (Reason & Bradbury, 2006; Jordan, 2003).

In the spirit of the CBAR approach, a questionnaire was developed, tested and analyzed with study respondents, leader organizations in the English-speaking sector, the funder of the research (SACAIS), and Deena White, a researcher from the Université de Montréal who had published an evaluation of the Politique (See Footnote 1 for explanation of Politique).

The self-reporting survey asked information about the following areas: regions the groups work in, demographic information of the groups, language capacity of the group, legal status, sources of funding, eligibility for Québec government global mission funding and network affiliations.

1. Although not a goal at the beginning of the study, an emergent objective of the research was to collaborate with francophone community groups who are also experiencing exclusion (Metivier, 2011; RIOCM, 2008; White, 2008) to sensitize government decision-makers and to promote changes to the Politique de reconnaissance et de soutien à l’action communautaire (a policy created by the Québec government to provide support and recognition to the community sector, primarily through core funding that covers basic salaries, rent and the basic activities of fulfilling the mission of the organization) or its implementation.
The survey was launched in regions of Québec where there is a presence of English-speaking, bilingual and ethno-cultural groups. The questionnaire was developed using the on-line survey tool, Survey Monkey. Altogether, groups from 14 regions of Québec participated in the survey: Montréal, Laval, Estrie, Outaouais, Laurentiens, Lanaudière, Abitibi-Témiscamingue, Capitale Nationale, Montérégie, Iles-de-la-Madeleine, Côte Nord, Gaspésie, and Chaudière Appalaches (groups serving all of Québec are counted as one region).

For the purposes of this study, in some cases regions were combined and in other cases, reported on separately. This was done to reflect how English-speaking communities identify themselves. (For example: Gaspésie and Iles-de-la-Madeleine were reported on separately, even though they are considered one region, as they have two distinct English-speaking communities.)

The questionnaire was launched with a mailing to COCo’s e-bulletin list in April 2009 and was also distributed via other networks. This random sampling approach (McMillan, 2004) was followed, in each year of the study, by a more targeted approach where a specific list of community groups was compiled and phone calls to specific organizations were made. Altogether, close to 800 community groups were identified and 290 completed the questionnaire.

FINDINGS

Regions groups work in

Of the 290 participating groups, the Montréal region represented slightly over half of the respondents (146 groups). Strong participation was also noted in the following regions: Laval, Capitale Nationale, Estrie, Côte Nord, Iles-de-la-Madeleine and Outaouais.
In the Know: Identifying multiple aspects of Québec’s community sector

Executive Summary

PROFILE OF THE GROUPS

Small, with most groups having between 0 – 5 part time and full time employees (full time: 130 of 240 groups, part time: 113 of 231 groups).

Longstanding, with a majority of the groups in existence for 11 years or more (69% or 188 of 281 groups).

A strong minority (33.9%) of the 290 groups can offer services in languages other than English or French. The languages include: Spanish, South Asian languages (Tamil, Urdu, Hindi), Arabic, Pilipino dialects (Tagalog and other), and Creole. Over two-thirds of these groups work in the Montreal region.

The groups serve a large variety of populations, respond to many different social needs and involve a wide range of sectors of activity.

Annual yearly budget

The overall budget of most of the groups is small: 103 out of 237 reporting groups (43.5%) have an annual budget that is less than $100,000, while 53 groups (22.4%) have an annual budget of between $100,000 and $250,000. 33 groups (13.9%) have no real budget at all and are mostly comprised of volunteers.

Funding: Funding other than from the Government of Québec

Groups have a wide diversity of types of funding from both government and non-government sources that include: the federal government, foundations, independent fundraising, fees for services and products, municipal government and in-kind support. However, as the survey did not ask what percentage of the groups’ budget these sources account for, it is impossible to tell how important these sources of funding actually are to the groups.

LANGUAGE CAPACITIES

The following information summarizes the language capacities of the groups in English and French:

The highest percentage of groups uses English as a primary language at work: 40.2 % or 114 out of 283 reporting groups. 95 groups (33.6%) use English and French as primary languages at work and 65 groups (23.0%) use French as a primary language of work.

Language capacities in English are very strong: 83% or 230 out of 277 reporting groups are very able to provide services in English. A high percentage of groups also appear to have a functional to very good level of French: 65.7% or 182 out of 277 reporting groups are very able to provide services in French while 28.2 % or 78 groups are somewhat able.
Funding: Government of Québec sources

Groups receive two types of funding from the Québec government: project or service funding which is short in duration, which must be renewed and which responds to government rather than community priorities. The other type of funding is global mission funding, which is recurring and covers basic salaries, rent and the basic activities of fulfilling the mission of the organization. Global mission funding represents a more stable source of funding.

Groups find themselves in a precarious position in terms of receiving funding from the Québec government: 41% (52 of 107 reporting groups) report that project/service funding accounts for more than half of their budget. At the same time, for 56.6% (56 of 99 reporting groups), global mission funding accounts for less than half of their budget.

Groups have had a much harder time, as of 2003, securing global mission funding: of 99 reporting groups, 60.6% (60 groups) began receiving global mission funding before 2003. This is due to limited funds being made available for global mission funding in more recent years.

Funding: Québec government global mission funding eligibility

A very high percentage of groups have not applied for this source of funding in the last 3 years: of 119 reporting groups, 80.7% (96 groups) have not applied for global mission funding in this time period. Many of these groups seem to lack information about the existence of this type of funding. Of the original 106 groups that expressed interest in knowing more about the criteria for Québec government global mission funding, 71.7% (76 groups) appeared to meet the criteria for this type of funding after answering a series of eligibility questions. Of these 76 groups, 30 work with ethno-cultural communities.
There is a specific challenge for ethno-cultural groups to receive global mission funding. When these groups do not specifically identify their work as ‘integration into Québec society’, they appear to have difficulty obtaining funding from the Ministry of Immigration and Cultural Communities. When they identify their work with a specific ethno-cultural community, there is resistance from funders because of the unwillingness to fund specific populations (RIOCM, 2008).

**Networks**

Many groups appear to be active in networks. While some groups belong to one network only, most groups indicated belonging to at least two or three networks. Of 290 groups, 75.2% (218 groups) indicated belonging to a first network, 55.5% (161 groups) to a second network, and 41.4% (120 groups) to a third network. The highest rate of participation is in regional networks (cited 153 times), and English-speaking networks (cited 97 times). Participation in Québec–wide networks is cited 73 times. A total of 68% of 357 networks named are part of the broader francophone community sector.

The relatively low response rates for participation in Québec-wide networks (73 responses compared to 225 responses for involvement in local or regional networks) raises questions about whether there is adequate leadership of groups in the English-speaking, bilingual and ethno-cultural community groups at the decision-making and policy influencing networks. This finding speaks to the need for more action research into this area.
**IMPLICATIONS OF THIS RESEARCH**

In response to the emerging data, COCo has initiated a variety of specific actions over the past three years. The following is a summary of some of these actions.

COCo designed a google map, which permitted groups to offer their coordinates and give a summary of their activities; permitting them to have a web presence. This action was in response to the fact that only 23% of the 559 groups identified in the first year of the In the Know project indicated having access to a website. Final statistics indicated that 34% of groups do not have a website (99 out of 290 groups). Altogether, 249 of the 290 participating groups have joined this google map. See (https://maps.google.ca/maps/ms?ie=UTF8&hl=en&msa=0&msid=103546236201983514608.0004704004b59e3619c25&z=7).

COCo has continued providing information to groups on funding from the Government of Québec. Specifically, free consultation sessions (info-COCO’s) have been given to groups to explain funding requirements and ‘e-note’s (info pieces) are available in the monthly COCo e-bulletin (http://coco-net.org/current-e-bulletin).

COCo shared the emerging data with government staff at a Comité Interministériel 2 meeting in January 2011 and more informally at a SACAIS event in the fall of 2011. Emerging data was also presented 10 times to community groups and networking events connected with COCo’s work. In April 2010, COCo partnered with the Réseau québécois de l’action communautaire autonome (RQ-ACA)3 to hold an information session on the history and current context of funding from the Government of Québec.

Finally, COCo presented the research data at the Action Francophone Pour le Savoir (ACFAS) conference in 2010, 2011 and 2012. An article on Year One data was published with the Journal for Eastern Township Studies in April 2011 and a summative article is being written about the overall findings of the research.

---

2. A Québec government committee that brings together representatives from the ministries that fund community work (through the application of the Politique de reconnaissance et de soutien à l’action communautaire)

3. For a description of and link to RQ-ACA, see ANNEX XXI: LIST OF ACRONYMS AND DEFINITIONS in the full final report (See: link to final report)
More actions are needed. This research identifies several potential avenues that COCo would like to explore with its network:

Do groups see the need for fuller participation or collaboration of members of the English-speaking, ethno-cultural and bilingual community sector in places of greater leadership in the Francophone community sector? What would this look like?

How to provide more education to interested groups in the English-speaking, ethno-cultural and bilingual community sector about the Francophone community sector.

How to foster stronger links and dialogue between the Government of Quebec and the English-speaking, ethno-cultural and bilingual community sector.

Advance and test the hypothesis about why these groups are marginalized or excluded.

Do we want to have a more precise idea of who is part of the English-speaking, bilingual and ethno-cultural community sector network? Do we need to more fully understand how these groups have emerged, survived and thrive?

ACKNOWLEDGEMENTS

This project was carried out by The Centre for Community Organizations (COCo), with funding from the Secretariat à l’Action Communautaire Autonome et aux Initiatives Sociales (SACAI). COCo would like to thank Deena White, researcher at the Université de Montréal, for her background research and participation in the creation of the survey and Ginette Drouin (MELS) for her help in creation of the survey. Thanks also go to all the groups that publicized the survey in their networks throughout the three years and to Coasters Association (Lower North Shore) and CAMI (Îles-de-la-Madeleine) for the outreach work they did in their communities.

COCo also wishes to thank all the groups and individuals who participated in the creation of the survey, who filled out the survey and who took part in the focus groups and analysis.

Staff that worked on the project are:

Sarah Blumel
Loralie Bromby

INTRODUCTION

In October of 2008, The Centre for Community Organizations (COCo) began a community research project to help develop a better understanding of the diversity of groups working for social change in Québec. The study, “In the Know: Identifying multiple aspects of Québec’s community sector”, was supported by the Secretariat à l’Action Communautaire Autonome et aux Initiatives Sociales (SACAIS) and aimed to survey English-speaking, bilingual and ethno-cultural community groups across Québec over a three year period. The research was carried out between 2009 and 2012.

Context of the Study

In the 1980’s, a mobilization of Québec community groups took place that called for a policy that would recognize and support the work of grassroots and other community groups in Québec (McAneeley, 2007). In response, the Québec government created the Secretariat à l’Action Communautaire Autonome (SACA), which later became SACAIS (Secretariat à l’Action Communautaire Autonome et aux Initiatives Sociales). In collaboration with the community sector, SACAIS provided leadership for the development of a Politique de reconnaissance et de soutien à l’action communautaire - commonly known as the Politique - a policy whose main objective is to provide recognition and financial support to the community sector as of 2001 (Government of Québec, 2001). Its aim was to recognize community action with a view to social development and the elimination of exclusion (Government of Québec, 2001b, p. 9).

Specifically, the policy was designed to support community groups across the 22 Québec ministries, primarily in the form of ‘global funding’ (often referred to in the English-speaking community sector as core funding) which covers salaries, rent and the basic activities of fulfilling the mission of the organization. Community organizations are paired with a “home ministry” according to their main sphere of activity. This reorganization of funding for the community sector, occurred with limited participation from English-speaking, bilingual and ethno-cultural groups.

A five-year evaluation of the Politique was completed in 2008 by sociology professor Deena White, and her research team at the Université de Montréal. While recognizing how progressive the Politique is in relation to funding for the community sector in the rest of the western world, White had specific criticisms about the overall implementation of the policy. The study indicates that many community groups are either poorly or not at all known by the Québec government (White et al, 2008). While these can include certain Francophone groups, White et al stress that, in particular, the specificities of English-speaking, bilingual and ethno-cultural community groups are, for the most part, unacknowledged by the government. These “invisible” groups, whether Francophone or Anglophone, are usually left out of the Politique’s funding (White et al, 2008).

Since its inception in 2000, COCo has identified trends within groups that are part of its network: self-described “ethno-cultural, bilingual and English-speaking community groups” (Blumel & Ravensbergen, 2011, p. 2). Through its work with approximately 400 groups a year, COCo suspected that the groups in their
network are generally more diverse in their services and programs, less connected to formal networks in Québec and working with less government funding than their Francophone counterparts. While not all groups want to be connected to formal networks or government funding, there are those in the COCo network who do. After organizing two forums about Québec Government funding, it became obvious to COCo that most groups in their network have little knowledge of SACAIS, Québec government funding or the vast formal network system that exists among community groups in Québec. Discussions between COCo and SACAIS officials identified the need to more fully document the reality of English-speaking, bilingual and ethno-cultural groups. In the Know has sought to do this.

The Study

Objectives of the research

- Locate Anglophone1, bilingual and ethno-cultural community groups in Québec.
- Develop a portrait and understanding of Anglophone, bilingual and ethno-cultural community groups working in Québec.
- Identify the characteristics and patterns that emerge about the recognition of groups by the Québec government, and the types of activities and structures of these groups.
- Advance and test the hypothesis about why these groups are marginalized or excluded.
- Propose strategies to support the recognition and inclusion of these groups in the Francophone community sector.

Although not a goal at the beginning of the study, an emergent objective of the research was to collaborate with Francophone community groups who are also experiencing exclusion (Metivier, 2011; RIOCM, 2008; White, 2008) to sensitize government decision-makers and to promote changes to the Politique or its implementation.

Overall, the research is meant to support COCo in carrying out its mission to support community groups and to encourage healthy practices for a more just society. The findings and conclusions of the study will allow COCo and its community partners to put in place new structures and activities in the Anglophone, bilingual and ethno-cultural groups that will respond to their needs and will support their capacity to offer better services in their communities.

Methodology: a community-based action research approach

COCo decided early on that a community-based action research (CBAR) approach would reflect not only its interest in documenting the relationship between the English-speaking, ethno-cultural and bilingual community groups and the Québec government but its desire to see changes occur in that relationship. Community-based action research can be defined as “research rooted in the community, serving community interests” (Flicker, Savan, McGrath, Kolenda and Mildenerberger, 2007, p. 241) that requires meaningful

---

1. At the application stage of the research proposal COCo was using the work Anglophone to describe the English-speaking community groups it works with. Since then, the term used is English-speaking to denote people who tend to use English as their primary ‘official language’ (with French and English being the choices as per the Government of Canada definitions). However, COCo also tends to let groups self-define: English-speaking, Anglophone, bilingual etc. During the research COCo also began to use the word racialized community groups instead of ethno-cultural community groups. Although racialized seemed to better describe the groups we were talking about, there was a lack of understanding and acceptance of the term amongst partners; hence ethno-cultural continues to be used for now.
participant involvement in all phases of the research (Reason & Bradbury, 2006; Jordan, 2003), that must be emancipatory and empowering (Boog, 2003), and that must also focus on action (Reason & Bradbury, 2006; Jordan, 2003) not only research. According to Flicker et al (2007), there has been an increased interest in CBAR approaches in Canada with local and national funding bodies putting out “specialized calls that demand partnership approaches” (p. 243). Flicker et al (2007) describe some of the conditions needed for CBAR to be effective: sufficient time and funding, clarity of roles and expectations, ability to put into action the results of the research, and the ability to adequately involve, in all aspects of the process, community providers, members, funders and academics. Taking into consideration these factors, this research has allowed for a three-year process, adequate funding, and a plan for follow up. COCo has also, as a community group, clearly taken the lead of the research, with support from other community groups, government and the academic researcher.

In the spirit of the CBAR approach, a questionnaire was developed, tested and analyzed with potential respondents, several leader groups in the English-speaking sector, the funder of the research (SACAIS), and Deena White, from the Université de Montréal. In creating collaborative survey designs, Flicker, Guta, Larkin, Flynn, Fridkin, Travers, Pole and Layne (2010) emphasize that surveys must be developed from the “ground up” (p.114) and therefore must involve multiple sessions, consultations and conversations, with adjustments and improvements being made along the way. Zarinpoush (2006) stresses the need for adequate time to carry out such a collaborative process in survey design. Patton (1982), for his part, states that potential for survey utilization is enhanced if stakeholders believe in, understand and have a stake in the data. Patton therefore advocates the direct involvement of stakeholders “in the painstaking process of making decisions about what data to collect and how to collect them” (p. 141).

The questionnaire asked information about the following areas: region of Québec the groups work in, demographic information of the groups (size, sector of activity, populations served), language capacity of the groups (English, French, and other languages), legal status, types of funding (from sources other than the Government of Québec as well as Québec government sources), eligibility for Québec government global mission funding and network affiliations. (For a copy of the survey questions, see Annex I). The questionnaire was primarily designed to elicit quantitative results, but in some cases provided respondents with a response of “Other” or “Tell us more” that allowed for qualitative (text) responses. Respondents were also permitted to leave questions unanswered with a result that the number of responses considered in each analysis varied. The survey took approximately 20-30 minutes to complete, depending on whether the group was interested in seeing if it might qualify for global funding from the Government of Québec.

An on-going review of the literature was also carried out. It identified the following themes: there is little known about the community sector whether it be in Québec or in other parts of the Western World and there is little acknowledgement and even less knowledge about the similarities and differences between ethno-cultural, bilingual and English-speaking community groups and Francophone community groups in Québec. The literature review also revealed that English-speaking populations are interested in inclusion and integration into Québec society but that the ethno-cultural, bilingual, and English-speaking communities of Québec do not represent a single voice that can/should speak collectively. Finally, a review of the literature also identified that Québec has a well-structured and funded community sector that is exemplary in the Western World yet has some important challenges to overcome including the concern that state funding can lead to groups becoming an extension of the state. (See Annex II for a complete literature review).
The survey was launched in regions of Québec where there is a presence of English-speaking, bilingual and ethno-cultural groups. It was carried out over a three year period. The questionnaire was developed using the on-line survey administration service: Survey Monkey. Altogether, groups from 14 regions of Québec participated in the survey (groups serving all of Québec are counted as 1 region). The breakdown of the regions according to year of participation is shown in Table I.

**Table I. Regions participating in survey**

<td></td>
</tr>
</tbody>
</table>

The Nord du Québec region was not included in this survey because COCo has never had any contact with any groups in this region. No groups answered from Saguenay-Lac-Saint-Jean, Mauricie and Centre du Québec

The questionnaire was first launched with a mailing to COCo's e-bulletin list (comprised at the time of approximately 2000 names) in April 2009 and was also distributed via other networks in the first three regions chosen (Montréal, Laval and Estrie). This random sampling approach (McMillan, 2004) was followed by a more targeted approach where a specific list of community groups was compiled (based on lists of groups COCo was able to secure) and phone calls to specific groups were made. This procedure was repeated each year in the chosen regions. Altogether, close to 800 community groups were identified and 290 completed the questionnaire. The majority of the respondents who answered the survey are the coordinator/director of the group. Of 261 reporting groups, 64.4% (168 respondents) hold this position. Staff (38 groups), board members (37 groups), collective members (4 groups), volunteers (13 groups) and one intern also filled out the survey.

Results of the survey were further analyzed by focus groups, comprised of COCo staff, selected groups that had participated in the creation of the questionnaire, and several individuals with a broad understanding of the community sector. Kreuger and Neuman (2006) state that focus groups are useful in exploratory research and in the generation of new ideas when interpreting results. Data cleaning measures were applied to all survey answers. Final data analysis was carried out using Survey Monkey, Microsoft Excel and SPSS and included descriptive statistics and cross tabulations. Qualitative data were coded by category where answers warranted it.
FINDINGS

A) REGIONS GROUPS WORK IN

A1. Map of the regions

Figure I shows the regions of Québec as determined by the Québec government (Affaires municipales, Régions et Occupation du territoire du Québec, 2011). For the purposes of this study, in some cases regions were combined and in other cases, reported on separately. This was done to reflect how English-speaking communities identify themselves. (For example: Gaspésie and Iles-de-la-Madeleine were reported on separately, even though they are considered one region, as they have two distinct English-speaking communities.)

Figure I. Map of the regions of Québec

1. Bas St Laurent (reported on with region 11- Gaspésie)
2. Saguenay-Lac-Saint-Jean
3. Capitale Nationale
4. Mauricie
5. Estrie
6. Montréal
7. Outaouais
8. Abitibi-Témiscamingue
9. Lower North Shore (Côte Nord)
10. Nord du Québec
11. Gaspésie (includes Bas St Laurent-region 1)
12. Iles-de-la-Madeleine (reported on separately)
13. Chaudière Appalaches
14. Laval
15. Lanaudière
16. Laurentiens
17. Montérégie
18. Centre du Québec
A2. Number of groups participating from each region

Respondents were asked to identify which region of Québec their group works in. Montréal had the highest level of participation with 146 groups responding to the survey. This number accounts for slightly more than half of the 290 participating groups. The regions with the lowest level of participation include Lanaudière, Chaudière Appalaches, and Abitibi-Témiscamingue with 2 groups each responding to the survey. Table II gives a full summary of the number of participating groups from each region.

A3. Summary

With more than half of the respondents coming from the Montréal, this region accounts for the bulk of survey respondents. Considering that the survey targeted English-speaking, bilingual and ethno-cultural groups, this was not surprising. There was good participation from regions such as Côte Nord, Iles-de-la-Madeleine, Estrie and Outaouais; areas with higher levels of English-speaking populations. The lack of participation from Saguenay-Lac-Saint-Jean, Mauricie and Centre du Québec is also not surprising as there are few English-speakers and little representation of people from other ethno-cultural groups. Groups serving ‘All of Québec’ (groups with a Québec-wide mandate) are primarily located in the Montréal region (25 groups).

For a more in-depth profile of the participating groups in each of the regions, see Annexes III –XVI: IN THE KNOW: REGIONAL PROFILES.
B) PROFILE OF THE GROUPS

B1. Size of the groups

Respondents were asked how many staff and volunteers work for their groups. This was asked to determine the size of the groups participating in the survey. They are, for the most part, small groups: the majority has between 0 and 5 full-time and part-time employees. Of 241 responding groups, 54% (130 groups) have 0-5 full-time employees, and of 231 responding groups, 48.9% (113 groups) have 0-5 part-time employees (64 groups have both 0-5 full-time and 0-5 part-time employees). Out of 275 reporting groups, 248 (90.0%) have 6 or more volunteers. See Figure II.

Figure II. Size of the groups
B2. Length of time the groups have existed

The groups have existed for a long time: a majority of the groups participating in the survey have been in existence for 11 years or more. Of 281 reporting groups, 66.9% (188 groups) have existed for 11 years or more. 16% (45 groups) have existed for 6-10 years, 12.8% (36 groups) have existed for 2-5 years and 4.3% (12 groups) have existed for less than 2 years. See Figure III.

Figure III. Length of time the groups have existed

B3. Primary sector of work

Another survey question asked about the primary sector of work. The highest percentage of groups work in the Health and Social Services sector with 32.2% (74 out of 230 groups) answering that this is their primary sector. 20.9% of groups (48 groups) answered that Immigration and Cultural Communities is their primary sector of work. For a full summary, see Table III.

It is interesting to note that 47.4% (109 out of 230 groups) chose the “Other” option when answering this question, giving their own text answer in addition to or rather than choosing one of the government categories offered. Some of the “Other” answers included: “community building and development” “mix of everything” “most of the above”.

B4. Primary populations served

Respondents were asked to describe the primary populations served by their group. 24% of groups (50 out of 208) primarily serve families; while 15.9% (33 groups) primarily serve seniors and 15.4% (32 groups) primarily serve youth. For a full summary, see Table IV.

As in the case of sectors of work, a number of groups chose the “Other” option to provide their own answer in addition to or rather than choosing a government category. In this case, 80% (166 of 208 groups) chose the “Other” option.

Figure IV gives examples of some of these “Other” answers.
B5. Number of people reached each year

Respondents were asked how many people are reached each year by their group. Of 277 responding groups, 31% (86 groups) reach between 100 – 500 people a year. 25.9% (72 groups) reach between 1000-5000 people a year. 12% (33 groups) reach under 100 people a year, while 17.3% (48 groups) reach between 500-1000 people a year. Figure V summarizes these numbers.

A conservative estimate of the total number of people reached suggests these groups work with 473, 250 people; possibly as much as 36% of the community in Québec that uses English as a 'First Official Language Spoken' (FOLS).3

---

3. This would need to be verified through further research as there is probably some overlap of who is reached by different groups.
B6. Number of volunteer contribution hours each year

Another question asked the number of hours per year put in by volunteers. Out of 272 responding groups, 25.4% (69 groups) stated that volunteers contribute between 100-500 hours a year. 22.4% (61 groups) contribute between 1000-5000 hours a year, while those of 17.6% (48 groups) contribute between 500 and 1000 hours per year.

This finding suggests that there is the equivalent of approximately 268 full-time jobs provided for by volunteer hours by these groups.

B7. Access to a website/Google map

Only 23% of the 559 groups identified in the first year of the In the Know project indicated having access to a website. Therefore, COCo designed a Google map, which permitted groups to offer their coordinates and give a summary of their activities; permitting them to have a web presence. Final statistics indicated that 34% of groups do not have a website (99 out of 290 groups). Altogether, 249 of the 290 participating groups have joined this Google map. (See Google map: https://maps.google.ca/maps/ms?ie=UTF8&hl=en&msa=0&msid=103546236201983514608.0004704004b59e3619c25&z=7).
B8. Summary

The groups participating in this survey are small, but tenacious in terms of longevity. Those groups that are larger (i.e. more than 5 people involved) rely more on volunteers than paid employees. The groups serve a large variety of populations, reach many people, respond to different social needs and involve a wide range of sectors of activity. Many groups preferred to give their own description of the populations served or sectors of activity and did not rely on government categories offered in the survey. This may indicate a problem that the groups experience in identifying their activities within the confines of these categories, which appear to be too narrow for these groups, given that some of their answers include serving the community at large or the English-speaking community in general.

C) LANGUAGE CAPACITY

C1. Primary language used at place of work

English is the primary language used at work by 40.2% (114 out of 283 groups) of respondents. English and French are the primary languages used by 33.6% or 95 groups and 23.0% (65 groups) primarily use French as a language of work. See Table V.

Table V. Primary language used at place of work

<td>65</td>
<td>23.0</td>
</tr>
<tr>
<td>Other language than English or French</td>
<td>9</td>
<td>3.1</td>
</tr>
</tbody>
</table>

C2. Language capacities in English

A very high percentage of groups – 83% or 230 out of 277 reporting groups – are very able to provide services in English. 36 groups are somewhat able and 11 groups are not at all able. A high percentage of groups – 78.9% or 220 out of 279 groups – are very able to read and write in English. 52 groups are somewhat able and 7 are not at all able. See Figure VI for summary.
C3. Language capacities in French

A high percentage of respondents are either very or somewhat able to provide services in French. 65.7% of respondents (182 out of 277 reporting groups) are very able to provide services in French while 28.2% (78 groups) are somewhat able. 17 groups are not at all able.

A relatively high percentage of groups are either very able or somewhat able to read and write in French. 59.6% (165 out of 277 reporting groups) are very able to read and write in French. 37.2% (103 groups) are somewhat able. 9 groups are not at all able. See Figure VII.
Figure VII. Language capacities in French

![Bar chart showing language capacities in French]

C4. Other languages

A significant minority of groups are able to function in another language in addition to English and French. 33.9% (95 out of 280 groups reporting) are able to function in another language. Table VI shows some examples of other languages used by the groups in their workplace.

Table VI. Examples of other languages used by groups

<td>10 groups</td>
<td>10.5%</td>
</tr>
<tr>
<td>Creole</td>
<td>9 groups</td>
<td>9.5%</td>
</tr>
</tbody>
</table>

C5. Summary

Given the fact that the survey targeted English-speaking groups, it is not surprising to see the high percentage of groups that use English as a primary language at work, or whose language capacities in English are very strong. It is interesting to note that a high percentage of groups also appear to have a functional to very good level of French. The marginality of such groups, then, is not likely due to an inability to work in French. It is also noteworthy that a significant minority of groups are able to function in another language and that many can provide services in a variety of languages. Given that this survey also targets ethno-cultural groups, this result is also not surprising.
D) LEGAL STATUS

**D1. Legal status of the group (Not-for-profit etc.)**

A very high percentage of groups – 87.1% or 250 out of 287 reporting groups – are not-for-profit organizations. 5.6% (16 groups) have no status, 2.8% (8 groups) are informal associations and 2.1% (6 groups) are cooperatives. 2.4% (7 groups) answered “I don’t know.”

**D2. Charitable status**

Charitable status is obtained through the Canada Revenue Agency. Having this status allows groups to receive funding from foundations and to issue tax receipts to donors. It is therefore an important asset to a group to have charitable status, if they want to obtain certain types of funding, as long as it does not impede their advocacy work. (For details, see COCo’s info-sheet “Charitable Organizations: Limitations on Political Activities” http://www.coco-net.org/sites/coco-net.org/files/pol_limitations_infosheet.pdf).

Slightly more than half the groups – 50.6% or 140 of 250 groups reporting – have charitable status, while 38.4% (96 groups) do not. 14 groups (5.6%) answered “I don’t know” to this question.

**D3. Reason for not having charitable status**

Out of 96 reporting groups, 42.7% (41 groups) don’t wish to apply, 24% (23 groups) don’t believe they are eligible, 21.8% (21 groups) are in the process of applying, and 11.5% (11 groups) applied but were refused.

A number of groups chose the “Other” option to explain why they do not have charitable status, preferring to explain in their own words rather than relying on the above-mentioned options in the survey. The following are some of the reasons given:

"We team up with other organizations (who already have charitable status)"

"It's too complicated and tedious"

"We tried, but withdrew because of ethnocultural eligibility issues"

"We don't know how"
D4. Summary

A high percentage of groups are not-for-profit organizations as are the majority of groups working in the community sector. Although slightly more than half of the reporting groups have charitable status, certain accessibility and eligibility issues are noted: many respondents don’t believe they are eligible, applied but were refused or simply don’t wish to apply.

E) FUNDING

E1. Annual yearly budget (last 3 years, all sources)

Most groups have a small annual yearly budget, with the highest percentage of groups (22.4% or 53 out of 237 groups reporting) having an annual budget of between $100,000 and $250,000. 13.9% (33 groups) having no real budget at all and are comprised of volunteers. See Table VII for summary.

Table VII. Annual yearly budget (last 3 years, all sources)

<table>

<td>45</td>
<td>19.0</td>
</tr>
<tr>
<td>Over $500,000</td>
<td>36</td>
<td>15.2</td>
</tr>
</tbody>
</table>

E2. Funding other than from the Government of Québec

A large number of groups receive funding from a variety of sources other than from the Québec government: the federal government, foundations, independent fundraising, fees for services and products, municipal government and in-kind support.
The highest percentage of groups receive funding from in-kind support (74% or 162 out of 219 groups) and from independent fundraising (72.9% or 159 out of 218 groups), both non-governmental types of funding. However, the survey did not ask what percentage of the annual budget came from these sources. 64.3% (or 142 of 221 groups) receive funding from the federal government. 58.3% (123 out of 211 groups) receive funding from the municipal government and 54.8% (115 out of 210 groups) receive funding from foundations. See Table VIII.

**Table VIII. Funding other than from the Government of Québec**

<table>
<thead>
<tr>
<th>Source of funding</th>

<td>58.3</td>
</tr>
<tr>
<td>Foundations</td>
<td>115</td>
<td>210</td>
<td>54.8</td>
</tr>
</tbody>
</table>

**E3. Summary**

Although the overall yearly budget of most of the respondents is relatively small with 65.8% of groups working with under $250,000, they have a diversity of types of funding from both government and non-government sources. Some of the results, however, may be misleading as some of these types of funding – fundraising and in-kind support, for example – may account for a very small percent of a group’s overall budget.

**F) GOVERNMENT OF Québec FUNDING**

**F1. Government of Québec project or service funding**

Service or project funding is provided to finance a specific service or project, often for a limited mandate and duration. 54.7%, (134 of 245 groups reporting) receive project or service funding from the Québec government. 45.3% (111 groups) do not.
The highest number of groups receives this type of funding from the Ministry of Health and Social Services (52% or 65 out of 124 groups reporting), Emploi Québec (44% or 55 groups) and the Ministry of Immigration and Cultural Communities (27.2% or 34 groups). See Table IX.

**Table IX. Government of Québec project or service funding**

The survey also allowed respondents to fill in their own answer to this question. Some of the « Other » ministries named included: Ministry of Communications, Culture, and the Status of Women, Ministry of Economic Development, Innovation and Export Trade, and Québec Youth Secretariat.

Of 127 reporting groups, 59% (75 groups) reported that project/service funding provides for less than half of their budget, while 41% (52 groups) reported that it provides for more than half of their budget. See Table X.

**Table X. Project or service funding – percentage of group’s budget**

F2. Government of Québec global mission funding

Global mission funding, or core funding, covers the basic salaries, rent and basic activities of a group to help it fulfill its mandate. 40.3% (98 of 243 groups reporting) receive global mission funding from the Government of Québec. 52.7% (128 groups) do not. 17 of the groups reported they do not know.

Of 91 reporting groups, 64.8% (59 groups) receive global mission funding from the Ministry of Health and Social Services, and 11.0% (10 groups) receive this funding from the Ministry of Education and Sports (MELS). See Table XI for full summary.

Table XI. Government of Québec global mission funding

</tr>
</tbody>
</table>

Groups were allowed to answer this question by writing in their own answer. “Other” ministries from which they receive global mission funding included: Ministry of Employment and Social Solidarity, Ministry of International Relations and Ministry of Communications, Culture, and the Status of Women.

Of 99 reporting groups, 56.6% (56 groups) report that global mission funding provides for less than half of their budget, while 43.3% (43 groups) report that it provides for more than half of their budget. See Table XII.

---

4. Although 98 groups answered that they receive global mission funding, 99 groups answered the questions about percentage of group's budget and the year that the group began receiving global mission funding.
Table XII. Global mission funding – percentage of group’s budget

<table>
<thead>
<tr>

</tbody>
</table>

The majority of groups have not received global mission funding since 2003: of 99* reporting groups, 60.6% (60 groups) began receiving global mission funding before 2003, and 4 groups received it during 2003 (4%). Only 16 groups (17%) have received it as of 2004. 19 groups answered “I don't know”. See Figure VIII. (*See footnote above)

Figure VIII. Year that groups began receiving global mission funding

n = 99
F3. Relationship with Government of Québec

Respondents were asked to describe their interactions with Québec government officials or representatives. These can be project managers, elected members of the National Assembly, various other officials, etc. The highest number of groups (34.8% or 80 out of 230 reporting groups) described their relationship as “Fine”; while 26.5% (61 groups) answered that they have little contact with the Québec government. See Table XIII for full summary.

65 groups used the space provided – “Tell us more” – to answer this question in their own words. Although a number of answers displayed a neutral attitude, 22 groups indicated a good relationship with Québec government officials. Approximately 30 groups indicated that this relationship was not good. Some of the answers included:
F4. Relationship with Government of Québec in relation to funding

A cross tabulation was performed to see if groups receiving funding have a different relationship with the Government of Québec than those who do not.

Most of the groups who receive project or service funding or/and global mission funding rated their relationships with Québec funders as “Fine” or “Excellent”. For those receiving project or service funding, 48% (62 out of 129 reporting groups) answered “Fine” and 19.4% (25 groups) answered “Excellent.” For those receiving global mission funding, 52% (49 out of 95 reporting groups), answered “Fine” and 17% (16 groups) described the relationship as “Excellent.”

For those not receiving project or service funding or global mission funding, the highest percentage of groups answered that they have “little contact” with government funders. For those not receiving project or service funding, out of 101 groups reporting, 44.6% (45 groups) have “little contact”, while for those not receiving global mission funding, out of 120 reporting groups, 38.3% (46 groups) have “little contact”.

F5. Summary

Slightly over half of the groups receive service or project funding from the Government of Québec; the Ministry of Health and Social Services is the largest Government of Québec funder for all types of Government of Québec funding (over 50% of all funding).

40.3% (98 of 243 groups) responding to the survey receive global mission funding. However, the funding covers less than 50% of the overall budget for 56.6% of the groups (Table XII). This can be seen as problematic given that global mission funding is meant to cover core costs. 54.7%, (134 of 245 groups reporting) receive project or service contract funding. 40.9% of the groups depend on project or service funding for over 50% of their overall funding. This may entail a precarious situation for these groups because project and service funding have limited mandates or – for project funding specifically – is short-term funding.

Groups have had a much harder time, as of 2003, securing global mission funding. This may be due to the fact that there are few new funds being made available for global mission funding since then.

For more detailed reporting on the findings about Government of Québec global mission funding in relation to other funding and region/language of the group, please see Annex XVII: INFO SHEET: GOVERNMENT OF Québec AND GLOBAL MISSION FUNDING IN RELATION TO OTHER VARIABLES.

Although a greater percentage of groups, compared to other categories, rate their relationships with the Government of Québec as “fine”, there is a difference in this relationship between those groups who receive Government of Québec funding and those who don’t. Of the 221 groups not receiving any funding from the Government of Québec, 19.5% (43 groups) rated their relationship with the government as “Fine” compared to 49.6% (111 of 224 groups) for those who receive global or project or service funding. Asking a question like this one in a survey, however, provides limited information and was done to be able to follow up on this subject in focus groups.
G) ELIGIBILITY – GOVERNMENT OF Québec GLOBAL MISSION FUNDING

G1. Groups not receiving global mission funding

A very high percentage of groups have not applied for this source of funding recently: of the 119 reporting groups, 80.7% (96 groups) have not applied for global mission funding in the last 3 years (based on the year they filled out the survey). 23 groups have applied for it.

Of the 23 groups that have applied for global mission funding, 21 reported which ministry they applied to: 33.3% (7 groups) applied to the Ministry of Health and Social Services and 23.8% (5 groups) applied to the Ministry of Immigration and Cultural Communities. See Table XIV.

Table XIV. Global mission funding: ministry applied to in last 3 years

</tr>
</tbody>
</table>
“Other” answers included:

- “our group covers too many disciplines”
- “we respond to the criteria of defending collective rights but we have not been part of the groups selected for first-time mission funding”
- “our group receives funding from another source.”

The 96 groups that have not applied for global mission funding in the last three years were asked why they have not applied. This was an open-ended question eliciting qualitative (text) responses. Figure IX gives a breakdown of the types of answers given. The most common reason for not applying (32 comments) spoke about lack of information about the funding or how to apply for it.

Figure IX. Examples of why some groups have not applied for global mission funding

- Group is new: 5 groups
- Lack of information about existence of funding or how to apply for it: 32 groups
- Group does not think it would qualify: 7 groups
- Lack of resources, time or capacity (i.e. language ability) to apply: 10 groups
G2. Interest in knowing about eligibility for global mission funding

The survey asked respondents not receiving global mission funding if the idea of having this type of funding appealed to their group. Of 115 reporting groups, a high percentage – 79.1% or 91 groups – answered “Yes” to this question. 24 groups answered “No.”

The survey also asked if those not receiving global mission funding wanted to know more about the criteria the Government of Québec would follow in order to assess eligibility for global mission funding. Of 113 reporting groups, a very high percentage – 93.8% or 106 groups – answered “Yes”. 7 groups answered “No”.

G3. Government of Québec criteria for global mission funding

For those groups expressing an interest in knowing more about Government of Québec’s criteria for global mission funding, the survey asked a series of questions to determine possible eligibility (The questions were derived from the main requirements from the Cadre de Référence en Matière d’action Communautaire, 2004; http://www.mess.gouv.qc.ca/sacais/action-communautaire/cadre-reference.asp. They were chosen with the assistance of a senior official in the government. For a summary of all the questions asked to determine eligibility, see Annex XVIII)

G3a. The group must meet the definition of a community organization

The first set of questions determined if the groups meet the criteria to be considered a community organization. A “No” response indicated that they meet the criteria, while a “Yes” response indicated that they do not. A very high percentage of groups – between 94% and 99% of reporting groups – answered “No” to this first series of questions. See Table XVI.

Table XVI. Criteria to be considered a community organization

<table>
<thead>
<tr>
<th>Québec government criteria to be considered a community organization</th>

<tr>
<td>Is the group a local or chapter of a union?</td>
<td>1</td>
<td>1.0</td>
<td>96</td>
<td>99.0</td>
<td>100</td>
</tr>
</tbody>
</table>
G3b. The group must meet the criteria for funding community groups

A second set of questions was asked to determine eligibility as a ‘community action organization’. Organizations meeting these requirements qualify for some Government of Québec funding but not specifically as an ‘autonomous community action organization’ (which represents the final criteria to receive global mission funding).

In this case, a “Yes” response indicated that they meet the criteria to be a community action organization, while a “No” response indicated that they do not. A very high percentage of groups – between 95% and 99% of reporting groups – answered “Yes” to this series of questions. See Table XVII.

Table XVII. Criteria for funding community groups

<table>
<thead>
<tr>

<td>90</td>
<td>95.7</td>
<td>4</td>
<td>4.3</td>
<td>94</td>
</tr>
</tbody>
</table>
G3c. The group must meet the criteria for funding autonomous community action groups

A third and final set of questions determined eligibility for global mission funding. These questions pertain to the autonomy of community action groups (indicating the group is an autonomous community action group). A “Yes” response indicated that they meet the criteria, while a “No” response indicated that they do not. A very high percentage of respondents – between 92% and 100% - answered “Yes” to this series of questions. See Table XVIII.

Table XVIII. Criteria for funding autonomous community action groups

<td>0</td>
<td>76</td>
<td></td>
</tr>
</tbody>
</table>
Of the original 106 groups that expressed interest in knowing more about the criteria for Government of Québec global mission funding, 71.7% (76 groups) appear to meet the criteria for this type of funding.

Of the remaining 30 interested groups, they do not appear to qualify as they do not meet the criteria of working towards social change5 (8.4%), were not founded as a grassroots initiative (7.8%), are a foundation (4.7%) or are not autonomous from the government (4.3%). See Table XVII.

G4. Summary

Very few groups have applied for global mission funding in the last 3 years. Of those that did apply, many don’t know why they did not receive it. Many groups seem to lack information altogether about the existence of global mission funding. These results suggest that many community groups still know very little about global mission funding and that communication is lacking between government funders and these groups.

At the same time, a very high percentage of groups not receiving global mission funding appear to be interested in knowing more about the government criteria for eligibility and a strong percentage of those interested (76 groups or 71.7 %) appear to qualify.

Moreover, there appears to be a correlation between not receiving global mission funding and being an ethno-cultural group. Ethno-cultural groups that work on integrating their community into Québec society implicitly have little opportunity to obtain global mission funding.

See Annex XIX: INFO SHEET: ETHNO-CULTURAL GROUPS AND GLOBAL MISSION FUNDING for details.

H) NETWORKS

H1. Number of groups involved in networks

Respondents were asked if they were involved in networks and to name their three most important network affiliations. Networks were defined as organized places to exchange with other concerned with similar issues. They were broken down into local (i.e. municipality or borough based youth, seniors ‘tables’; ‘table’ being defined as a place where groups working with similar citizens or on similar issues meet to share information and strategize together), regional (similar groups meeting at the more regional level; i.e. south-west of Montréal, Laval or Lower Laurentiens) or Québec-based (often known as regroupements or coalitions of groups with similar interests and often funded by the same Government of Québec funding body as the individual groups) networks.

While some groups belong to one network only, most groups indicated belonging to at least two or three networks. Of 290 groups, 75.2% (218 groups) indicated belonging to a first network, 55.5% (161 groups) to a second network, and 41.4% (120 groups) indicated belonging to a third network.

---

5. For global mission funding, the mission of the group must be to work towards social change, meaning the group decides without government intervention, what kind of action to take towards social transformation and the group shows it can meet the needs of the community and work towards individual and group empowerment.
H2. Network affiliations

Respondents were asked to name their network affiliations. Networks named in order of frequency were regional networks, followed by English-speaking networks, followed by local networks, followed by Québec-wide networks and then pan-Canadian networks. A total of 298 (or 68% of mentions) were networks that are part of the broader Francophone community sector.

H3. Length of time of network affiliation

Overall, groups have been involved in networks for a long period of time (over 10 years, 140 responses), followed by a short period of time (1-3 years, 124 responses) and then a medium length of time (4-6 years, 102 responses). For full summary, see Table XVIX.

Table XVIX. Length of time of network affiliation

<table>
<thead>
<tr>
<th>Length of time of network affiliation</th>

<td>83</td>
</tr>
<tr>
<td>More than 10 years</td>
<td>140</td>
</tr>
</tbody>
</table>

*The total number of responses included those answering for all three network affiliations

H4. Level of activity in networks compared to other groups

Respondents were asked to rate their level of activity in each of the three main networks they belong to compared to other groups involved in the network. The highest number of responses (218) indicate that groups are very active in their networks, followed by 192 responses which indicated average activity. See Table XX.

Table XX. Level of activity in network compared to other groups

<table>
<thead>
<tr>
<th>Level of activity in network</th>
<th>Total number of responses</th>
</tr>
</thead>
<tbody>
<tr>
<td>Very active</td>
<td>218</td>
</tr>
<tr>
<td>Average</td>
<td>192</td>
</tr>
<tr>
<td>Not very active</td>
<td>73</td>
</tr>
</tbody>
</table>

*The total number of responses included those answering for all three network affiliations
Respondents who answered “Not very active” were invited to write a text response to explain in their own words why they were not very active in the networks. 66 groups used this option and offered some of the following explanations: lack of time/human resources, network contact’s pertinence to group’s activities not that high, network meetings are in French, group is new. More specifically, some of the respondents answered:

"There is not much communication... for points of interaction"

"Token Anglo, overwhelmed with acceptance"

"All in French, very time consuming"

"Not interested"

**H5. Degree of usefulness of network contact**

Respondents were asked to rate the usefulness of their network contacts. An overwhelmingly high response (350 responses) rated the networks as “useful”. See Table XXI.

**Table XXI. Degree of usefulness of network contact**

<table>
<thead>
<tr>
<th>Degree of usefulness of network contact</th>

</tr>
<tr>
<td>Difficult</td>
<td>15</td>
</tr>
</tbody>
</table>

*The total number of responses included those answering for all three network affiliations*
An “Other” option was provided to those who wanted to answer this question in their own words. 44 groups chose the “Other” option and some of the answers included:

H6. Summary

Groups appear to have a high level of participation in networks. 218 groups participate in at least one network. The highest number of responses (140 of 478 responses) indicates a long-term implication in networks (more than 10 years). A high number of responses (218 of 483 responses) indicates that groups are very active in networks and the vast majority find these network affiliations useful (350 out of 461 responses). At the same time, an undercurrent of difficulties is expressed by the groups: many, in writing their own responses (text response), express cultural and language problems, communication difficulties, and a lack of acceptance in their network affiliations. This may explain, in part, the isolation and marginality of many English-speaking or ethno-cultural groups in relation to the formal, Francophone community network system in Québec. Moreover, there is significantly less participation at the Québec-wide level (73 mentions compared to 225 for local or regional). For a more detailed analysis of the types of networks groups are active in, see Annex XX: INFO SHEET: NETWORK ANALYSIS.
ANALYSIS OF THE FINDINGS

This research has identified several themes that emerge from the findings. This section explains each of these themes.

These groups are generally small, hardy and important for meeting citizen’s needs. English-speaking, bilingual and ethno-cultural community groups are well rooted in Québec, appear to have a tenacity to continue to exist despite limited resources. They respond to many different citizen’s needs.

Approximately 800 groups were identified. Of the 290 that completed the survey, a portrait begins to emerge of groups that have been in existence for quite a while (66.9% or 188 out of 281 reporting groups have existed for 11 years or more) yet are small (65.8% of groups have budgets under $250,000) and generally rely on few staff and many volunteers (90% of 275 reporting groups have 6 or more volunteers). Most groups respond to many different social needs and involve a wide range of sectors of activity. They may work with as much as 36 % of the English FOLS (First Official Language Spoken) community. One third (or 95 out of 280 reporting groups) are able to function in languages other than English or French.

This profile reflects what COCo has been seeing in its work with groups over the past 12 years. Given the oft-minority status of citizens these groups tend to work with and the multiplicity of needs of these citizens, these groups appear to have developed many services to respond to the needs of their specific community. Specialization of programs and services appears to be, for the most part, a luxury that small populations in often isolated areas do not allow for. Yet, these groups touch the lives of many Québec citizens.

Many of the groups participating do not appear to promote themselves beyond their local constituency. 34% (99 out of 290 groups) groups did not have a website when they completed the survey. Although this one fact may not be indicative of a lack of interest in promoting a group’s existence, the fact that many groups work with ethno-cultural and other specific communities may underscore their lack of interest in having a website as potential members or participants hear about them through word of mouth. The lack of a website may however exclude others (e.g. funders) from knowing about the group and its work.

Many of the groups participating in the survey are unknown to the Government of Québec. This became evident during a presentation to representatives of the different ministries of preliminary results in the fall of 2011 when examples of types of organizations were presented. There was a curiosity, but not knowledge, from government officials about the English-speaking, ethno-cultural and bilingual community sector.

Moreover, groups that are not funded by the Government of Québec indicated they have little contact with government officials. If groups want to be acknowledged and funded by the Government of Québec, mutually supportive relationships need to be formed.
Many staff and/or volunteers in these groups speak French but may not be understanding and using terms and concepts in the same way the Government of Québec does. Almost two-thirds of groups (65.7 % or 182 out of 277 reporting groups) indicated being very able to provide services in French and 28.2% (78 groups) reported being somewhat able to provide services in French. Yet, when asked to choose which sectors the group works in, 47.4% (109 out of 230 reporting groups) self-described, despite the fact that their answers could have been given in the list provided (the list provided reflects the Government of Québec categorization of sectors). Many groups do not appear to categorize their work in the same way the Government of Québec categorizes community work. As another example, during the work on this research, when asked if their group is a ‘community action group’ or an ‘autonomous community action group’, most group representatives had no idea what these terms referred to. As a final example: when comparing mission statements between those that work with ethno-cultural groups and receive global mission funding and those that don’t, we noted that groups receiving global mission funding use the word ‘integration’ twice as often as groups without global mission funding. The groups receiving global mission funding may know that integration is a key term to use to obtain funding from the Ministry of Immigration and Cultural Communities.

It appears that speaking the same language is not enough. Understanding the use of terms and concepts is just as important. For this to occur, it may be helpful for there to be more opportunities for English-speaking, bilingual and ethno-cultural groups to share their work with Government of Québec officials. As well, groups need to be informed and educated on the history and current funding reality in Québec for them to see and explain how they are part of meeting the needs of Québécois.

These groups may have challenges obtaining adequate funding. Many groups have diverse sources of funding. This is a positive sign and supported as good practice in the literature (Anheier, 2000; VON, 2002). However, given that the focus of this research was on the relationship of English-speaking, bilingual and ethno-cultural groups with the Government of Québec, details about amounts of types of funding were not asked. Regardless, this research raises questions about dependency on each source of funding. For example, the data shows that there appears to be a dependency on projects/service funding for some groups given that 40.9% of groups 127 reporting groups depend on project or service funding for over half of their overall funding. This may be of concern given that service funding is for specific government mandates within a limited time frame and does not necessarily correspond to identified community needs. As well, the data shows that for groups with global mission funding (40.3% or 98 of 243 reporting groups), this funding covers less than 50% of the overall budget for 56.6% (out of 99 reporting groups) of them. If global mission funding is not covering even half of the groups budget, this may indicate that global mission funding budgets are inadequate. However, without more data, these findings remain speculative.

A significant number of groups appear to qualify for global mission funding yet don’t have it (76 groups). The reasons for this are varied. On one hand, many groups do not seem to be aware of the funding and its requirements and, on the other hand, there have been few new funds available over the past years to allow new groups into the funding envelopes. Moreover, there is a requirement for groups to identify themselves with a ‘home ministry’ to obtain global mission funding. This can be difficult to do given that many of the groups participating in this study work on multiple needs. As well, information about global mission funding is not available in English and even Francophone groups often don’t know about it (Blumel & Ravensbergen, 2011, p. 132).
There is a specific challenge for ethno-cultural groups to receive global mission funding. As shown in this study, when they do not specifically identify their work as ‘integration into Québec society’, groups have difficulty obtaining funding from the Ministry of Immigration and Cultural Communities. When they identify their work with a specific ethno-cultural community, there is resistance from funders because of the unwillingness to fund specific populations (RIOCM, 2008).

Groups are involved in the broader Francophone community sector through participation in networks. However, there may be a lack of participation at the decision-making and policy-influencing levels. This research has provided good baseline data on participation in networks. There has been an assumption (COCo, 2008) that participation in the Francophone community sector was low (although increasing over time). This was not supported by the findings. 75% of groups shared information about network involvement, with 55.5% (161 groups) being involved in more than one network. A total of 68% of 357 networks mentioned are part of the broader Francophone community sector.

However, the relatively low response rates for participation in Québec-wide networks (73 responses compared to 225 responses for involvement in local or regional networks) has raised questions about whether there is adequate leadership (or even desire) of groups in the English-speaking, bilingual and ethno-cultural community groups at the decision-making and policy influencing networks. This finding speaks to the need for more action research into this area.

Less related to this study, but asked as interest stemming from other COCo work, this research has identified that there may be a lack of information and access to obtaining a charitable number, particularly for ethno-cultural groups. There were 23 groups that reported not knowing if they are eligible for charitable status (this number represents 25% of 96 groups reporting on why they don’t have charitable status) and 11 groups were refused charitable status (11.5% of these 96 groups). Of these 11 groups, 8 appear to serve cultural communities, and 3 serve English-speaking communities in the regions (Chaudière Appalache in particular). Obtaining charitable status is becoming an increasingly difficult endeavour (COCo, 2012; Elson, 2009) as no substantial changes to modernize the Charities Act have been made for many years; muzzling legal dissent and work on social justice issues. In fact, in recent years the government has published policy statements which clarify the act in ways that make it more difficult to obtain charitable status. This research suggests that this might be particularly true for ethno-cultural groups. Given the already-identified difficulty in obtaining global mission or core funding for these groups, they appear to be, once again, marginalized when it comes to being able to obtain funding.
IMPLICATIONS OF THIS RESEARCH

This section identifies the implications for action coming out of this research to support the purpose of the study: a deeper recognition and inclusion of these groups in the Francophone community sector. In response to the emerging data, COCo undertook several actions over the past three years.

To respond to the lack of public knowledge about the work of groups participating in the survey, COCo created a google docs map so that groups are ‘on the web’ (See https://maps.google.ca/maps/ms?ie=UTF8&hl=en&msa=0&msid=103546236201983514608.0004704004b59e3619c25&z=7). In 2011, COCo received a grant called “Spread the word: Communication and Networking for Community groups in Québec” from Heritage Canada to help groups with IT support. Most recently COCo launched Commun-IT: a project to help groups, in part, use internet technologies to promote themselves (http://commun-it.ca/).

Information on funding from the Government of Québec continued via COCo activities. Specifically, info- COCo’s (free consultation sessions) have been given to interested groups to explain funding requirements and ‘e-note’s (feature article in the monthly COCo e-bulletin; available from http://coco-net.org/current-e-bulletin). In April 2010, COCo partnered with the Réseau québécois de l’ action communautaire autonome (RQ-ACA) to hold an information session on the history and current context of funding from the Government of Québec. More work is needed in this area for interested groups. Better info sheets need to be developed.

COCo shared the emerging data with government staff at a Comité Interministériel meeting in January 2011 and more informally at a SACAIS event in the Fall of 2011. Emerging data was also presented 10 times to community groups and networking events connected with COCo’s work.

Lastly, COCo presented the data at the Action Francophone pour le Savoir (ACFAS) conference in 2010, 2011 and 2012. An article on Year One data was published with the Journal for Eastern Township Studies in April 2011 and a summative article is being written about the overall findings of the research.

More actions are needed. This research identifies several potential avenues that COCo would like to explore with its network.

1) Do groups see the need for fuller participation or collaboration of members of the English-speaking, ethno-cultural and bilingual community sector in places of greater leadership in the Francophone community sector? What would this look like? Where do strategic spaces and opportunities exist? What kind of capacity building support is needed?

6. For a description of and link to RQ-ACA, see ANNEX XXI: LIST OF ACRONYMS AND DEFINITIONS.

7. A Québec government committee that brings together representatives from the ministries that fund community work (through the application of the Politique de reconnaissance et de soutien à l’action communautaire ).
2) **How to provide more education to interested groups in the English-speaking, ethno-cultural and bilingual community sector about the Francophone community sector.** This could include information about the Francophone community sector's history, how it is organized and how to participate more fully in it.

3) **How to foster stronger links and dialogue between the Government of Québec and the English-speaking, ethno-cultural and bilingual community sector.**

4) **Do we want to have a more precise idea of who is part of the English-speaking, bilingual and ethno-cultural community sector network?** Do we need to more fully understand how these groups have emerged, survived and thrive? This could include, among other questions, the specific details on the number of groups, their history and legal status, funding details, the contribution they make to Québec society, the monetary value of their work, who is active in the Francophone community sector, how these groups became involved and what the challenges are.

5) The glimpse that this research has given us into the profile of these community groups underscores the rich diversity and history of this element of the Québec community sector. **Is there an interest in documenting the history and contribution of the English-speaking, bilingual and ethno-cultural community sector to the overall development of the community sector in Québec and to social action in Québec?**

**CHALLENGES OF THE STUDY**

This research has been well situated in terms of time frame, funding and partnerships support. The main challenge it faced was participation. Initial call-outs for participation were met with a muted response. Follow-up calls, visits to locations where groups congregate and collaboration with local organizations in several regions were more successful in generating participation.

Secondly, given that the survey was self-administered, there was some concern about the reliability about some of the answers such as language capacity in French. There was also a concern about the relevance of some data such as relationships with the Government of Québec, and the lack of details about groups’ funding. The last two concerns were recognized going into the process with the acknowledgement that asking more detailed questions in these areas could jeopardize the completion of the survey.

Finally, asking groups to go on-line to complete a survey was a challenge. Many participants needed to be walked through the process as an on-line survey was a new tool for them. COCo has taken this experience as an opportunity to introduce more groups to on-line surveys as one form of data collection.
NEXT STEPS

COCo plans to provide follow up work to this research by:

• Continuing to offer information to interested groups about how funding from the Government of Québec works (via the e-bulletin, website and Info COCo’s).
• Encouraging groups we work with to become or stay involved in appropriate networks, regroupements, tables and coalitions in the Francophone community sector.
• Working with interested groups to find the appropriate funding sources.
• Following up with potential partners on the themes identified in the section on implications of the research and further action to be explored.

CONCLUSION

Historically, little has been known or documented about the English-speaking, bilingual and ethno-cultural community groups working throughout the various regions of Québec. This research project, In the Know: Identifying multiple aspects of Québec’s community sector, has been an attempt to fill these gaps by identifying approximately 800 of these groups and by looking more closely at the 290 groups who took part in the study. The research and its resulting documentation represent one of the few studies carried out in Québec that specifically address these community groups and the work they do. It is also a wonderful example of how community-based action can be successfully implemented.

There is much appreciation of SACAIS for supporting this work financially and morally and to the groups who participated in the study. They make important contributions to the goals of the Government of Québec in the area of social development and the elimination of exclusion (Government of Québec, 2001, p. 16). They need to be more fully understood and supported to reach their potential.
ANNEX I

Welcome!

Thanks for helping the Centre for Community Organization (COCo) develop a better understanding of the ethnocultural, bilingual and English-speaking groups in Quebec and their relationships with the provincial government.

COCo is a provincial non-profit organization that promotes social justice, active citizenship and just socio-economic development by encouraging healthy community groups in Quebec through made-to-measure training, consultations, community learning events in English and French.

This survey is a part of a project supported by the Secrétariat à l'action communautaire autonome et aux initiatives sociales to help develop a better understanding of the diversity of groups working for social change in Quebec. We hope that you'll share our experience to help us paint a more accurate picture of our communities.

If you would like assistance in filling out this survey, call Sarah at COCo at 514-849-5599 or toll-free at 1-866-522-2626. She can also meet in person if that would be easier.

Information you provide here is confidential. Reports on results will not include detailed information naming specific groups. At the same time, we would like to use this opportunity to compile a list of groups who participate and their work to put on our website. You will have the opportunity to tell us whether or not you are interested in being listed as a resource for others through our website.

Let's get started!

1/
1. Your name

2. Your email address (only to be used for correspondence about this project)

3. Which of the following best describes your position with the group?

- Director/coordinator
- Board member
- Staff
- Volunteer
- Intern/stagiaire
- Collective member
- Other (please specify)

4. What were/was your first language(s)

- Both French and English
- French
- English
- Other(s) (please specify)

5. What is the name of the group you work with?

6. Please provide the following contact information for the group:

<table>
<thead>
<tr>
<th>Field</th>
<th>Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>Street address</td>
<td></td>
</tr>
<tr>
<td>City</td>
<td></td>
</tr>
<tr>
<td>Province</td>
<td></td>
</tr>
<tr>
<td>Postal code</td>
<td></td>
</tr>
<tr>
<td>Phone number</td>
<td></td>
</tr>
<tr>
<td>Fax number</td>
<td></td>
</tr>
<tr>
<td>Website</td>
<td></td>
</tr>
<tr>
<td>Email</td>
<td></td>
</tr>
</tbody>
</table>
3. Please tell us about the work the group does

1. What is the group's purpose or mission? (ex. To eliminate poverty through popular education and advocacy services for the underemployed)

2. Can we share your group's purpose, address, phone number, email and website through our website?

- [ ] Yes, use the information I provided above
- [ ] No

If you'd like different information to be shared on our site, please enter it below:

3. Which of the following choices best describes the sector the group is a part of, or the kind of work that you do?

- [ ] Arts
- [ ] Education
- [ ] Immigration and cultural communities
- [ ] Housing
- [ ] Health and social services
- [ ] Environment
- [ ] Employment and social re-insertion
- [ ] Local regional development
- [ ] Media and technology
- [ ] International development
- [ ] Cooperatives
- [ ] Advocacy/defense des droits
Other (please specify)

4. Which of the following best describes the populations your group works with?

Population

We work mostly
with:

But we also work
with:

Other (please specify)

5. On the average, how many different people does your organization reach each year?

- Under 100
- 100-500
- 500-1000
- 1000-5000
- More than 5000

6. Which option best describes the geographical region(s) served by your group?

- All of Quebec
- Montreal
- Laval
- The Easter Townships
- Estrie
- Outaouais
- Laurentiens
- Monteregie
- Capitale nationale
- Chaudiere-Appalaches
- Centre du Quebec
- Gaspesie
- Iles-de-la-Madelaines
- Cote Nord
4. Tell us more

We'd like to take this opportunity to learn a bit more about the people that work with your group.

1. How many people work for the group

   Number people

   | Full time | ☐ |
   | Part time | ☐ |
   | Unpaid volunteers, including board members | ☐ |

2. How many hours do volunteers contribute each year?

   ☐ under 100
   ☐ 100-500
   ☐ 500-1000
   ☐ 1000-5000
   ☐ 5000-10 000
   ☐ More than 10 000 hours

5. Tell us about language

This section asks you to reflect on the staff and volunteers who work with the group and their level of
comfort working in different languages.

1. Which best describes the languages used by your group?
   - We work mostly in English
   - We work mostly in French
   - We work in English and French
   - We work mostly in a language other than French or English

What other languages does your group work in? (please list)

2. How able is your group to provide services in English?
   - Very able
   - Somewhat able
   - Not at all able

3. What is your group's capacity to read and write in English? (mail, articles, letters)
   - Very able: many of us can
   - Somewhat able: some of us can
   - Not at all able: none of us can

4. How able is your group to provide services in French?
   - Very able
   - Somewhat able
   - Not at all able

5. What is the group's capacity to read and write in French? (mail, articles, letters)
6. Very able: many of us can

Somewhat able: some of us can

Not at all able: none of us can

6. Does the group function in other languages?

Yes

No

Which ones? (please specify)

6. Tell us about the legal status of the group

1. How long has the group existed?

Less than 2 years

Between 2 and 5 years

Between 6 and 10 years

11 years or more

I don't know

7. About charitable status

1. Does the group have charitable status?

Yes

No

I don't know

8. Since the group doesn't have charitable status...
1. Why not?

- We are in the process of applying
- We tried but were refused
- We don't wish to apply
- We believe we are not eligible

Other (please specify)

9. **Tell us about funding**

1. What is the group's average yearly budget, considering the last 3 years from all sources?

- No real budget, we all volunteer
- Under $25,000
- Between $25,000 and $50,000
- Between $50,000 and $100,000,
- Between $100,000 and $250,000
- Over $250,000
- Over $500,000

2. Please indicate what kinds of funding you have received over the last 3 years. Choose any that apply. We will be asking about provincial funding next.

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>Federal government</td>
<td>Federal government No</td>
</tr>
</tbody>
</table>

*Please indicate what kinds of funding you have received over the last 3 years. Choose any that apply. We will be asking about provincial funding next. Federal government Yes*
In the Know: Identifying multiple aspects of Québec’s community sector

Foundations
- Foundations Yes
- Foundations No

Independent fundraising
- Independent fundraising Yes
- Independent fundraising No

Fees for services or products
- Fees for services or products Yes
- Fees for services or products No

Municipal government
- Municipal government Yes
- Municipal government No

In-kind support
- In-kind support Yes
- In-kind support No

10. Tell us about provincial funding relationships

1. In general, how would you describe your interactions with the provincial government? (ex. elected members of the National Assembly, project managers, bureaucrats, government initiated consultations)
   - Excellent
   - Fine
   - Sometimes difficult
   - Difficult
   - We have little contact
   - It depends on the contact person

   Please tell us more

2. Does your group receive project funding, or service agreement funding from the provincial government?
   - Yes
11. Provincial project funding

1. Which Quebec ministries do you receive project funding from? (Check all that apply)

- [ ] Emploi Québec
- [ ] Ministère de la Santé et des Services Sociaux (MSSS or Ministry of health and social services)
- [ ] Ministère de l'Immigration et Communautés Culturelles (Ministry of Immigration and Cultural Communities)
- [ ] Ministère de la Famille et des Aînés (MFA or Ministry of Family and Elders)
- [ ] Ministère de l'Éducation, du Loisir et du Sport (MELS or Ministry of education and sports)
- [ ] Le Conseil des arts et des lettres du Québec (CALQ or Quebec Arts and Letters Council)
- [ ] Secrétariat à l'action communautaire autonome et aux initiatives sociales (SACAIS or Secretariat of autonomous community action)

Other (please specify)

2. On average, what is the percentage of the groups budget that is provided for by projects or service agreements?

- [ ] 25% or less
- [ ] 26-50%
- [ ] 51-75%
- [ ] 76-100%

12. A. Global Mission funding

1. Does the group receive global mission funding (recurring or ongoing funds to support the core work of an organization) from the provincial government?

- [ ] Yes
13. B. Global Mission funding

1. What percentage of the budget is covered by global mission (recurring) funding from Quebec?
   - 25% or less
   - 26-50%
   - 51-75%
   - 76-100%

2. Which ministry do you receive funding from?
   - Ministère de la Santé et des Services Sociaux (MSSS or Ministry of health and social services)
   - Ministère de l'Immigration et Communautés Culturelles (Ministry of Immigration and Cultural Communities)
   - Ministère de la Famille et des Aînés (MFA or Ministry of Family and Elders)
   - Ministère de l'Éducation, du Loisir et du Sport (MELS or Ministry of education and sports)
   - Le Conseil des arts et des lettres du Québec (CALQ or Quebec Arts and Letters Council)
   - Secrétariat à l'action communautaire autonome et aux initatives sociales (SACAIS or Secretariat of autonomous community action)
   - Other (please specify)

3. When did you begin receiving these funds?
   - 2007
   - 2006
14. A. Since the group doesn't receive global mission funding

1. Have you applied in the last 3 years?
   - Yes
   - No

15. B. Since the group doesn't receive global mission funding

1. To which ministry did the group apply?
   - Ministère de la Santé et des Services Sociaux (MSSS or Ministry of health and social services)
   - Ministère de l'Immigration et Communautés Culturelles (Ministry of Immigration and Cultural Communities)
   - Ministère de la Famille et des Aînés (MFA or Ministry of Family and Elders)
   - Ministry of immigration and cultural communities
   - Ministère de l'Éducation, du Loisir et du Sport (MELS or Ministry of education and sports)
   - Le Conseil des arts et des lettres du Québec (CALQ or Quebec Arts and Letters Council)
   - Secrétariat à l'action communautaire autonome et aux initiatives sociales (SACAIS or Secretariat of autonomous community action)
   - Other (please specify)

2. Why was the group refused funding?
16. Why haven't you applied?
1. Why hasn't your group applied for global mission funding with the Quebec government?

[ ] Didn't meet the criteria
[ ] We're on the waiting list
[ ] I don't know
[ ] Other (please specify)

17. Level of interest in global mission funding
1. Does the idea of establishing global mission funding from the Quebec government appeal to the group?

[ ] Yes
[ ] No

18. Global mission funding requirements
1. Would you like to know more about the criteria that the government would follow to assess your eligibility for global mission funding?

[ ] Yes
[ ] No

19. A. Is your group a community organization - as defined by the Quebec government?
1. Is your group a foundation whose main purpose is to collect and distribute funds? (i.e. family or community foundation)

[ ] Yes
### 10. Tell us about provincial funding relationships

1. In general, how would you describe your interactions with the provincial government? (ex. elected members of the National Assembly, project managers, bureaucrats, government initiated consultations)

   - [ ] Excellent
   - [ ] Fine
   - [ ] Sometimes difficult
   - [ ] Difficult
   - [ ] We have little contact
   - [ ] It depends on the contact person

   Please tell us more:

   ![Comment Field]

2. Does your group receive project funding, or service agreement funding from the provincial government?

   - [ ] Yes
25. B. The Government of Quebec's Criteria for funding community groups

1. Does the group have an active associative and democratic life, meaning it actively engages with its members and offers opportunities for widespread involvement as well as clear routes for participation such as an annual general assembly, and an active board of directors?

☐ Yes
☐ No

26. C. The Government of Quebec's Criteria for funding community groups

1. Does your group maintain its autonomy from government and other groups, meaning all members of the board come from the membership and the group is free to make its own autonomous decisions without being subject to rules from a professional order or government bodies?

☐ Yes
☐ No

27. A. The Government of Quebec's Criteria for funding autonomous community action groups

1. Was your group founded as a grassroots initiative, meaning citizens organized together around an issue of concern?

☐ Yes
☐ No

28. B. The Government of Quebec's Criteria for funding autonomous...
community action groups

1. Is the mission of the group to work towards social change, meaning the group decided without government intervention, what kind of action to take towards social transformation and the group shows it can meet the needs of the community and work towards individual and group empowerment?

☐ Yes
☐ No

29. C. The Government of Quebec's Criteria for funding autonomous community action groups

1. Does the group have a global approach to the issue of concern, meaning it uses a variety of practices to address the issues (services that address the root of the problem, education, mobilizing concerned people, advocacy etc.), and works with other groups to accomplish its goals?

☐ Yes
☐ No

30. D. The Government of Quebec's Criteria for funding autonomous community action groups

1. Is the group guided by a board of directors from the public at large, meaning there are no structural links to government networks?

☐ Yes
☐ No

31. It appears as though the group meets all the criteria

1. Can we contact you to participate in a focus group discussion about provincial, global mission funding challenges at a later date?

☐ Yes
☐ No

32. It doesn't look like you meet the criteria
20. B. Is your group a community organization?

1. Is the group a religious organization promoting specific religious beliefs? (i.e. Church group, synagogue, mosque)
   - Yes
   - No

21. C. Is your group a community organization?

1. Is your group an association of professionals? (i.e. Association of professional basket weavers)
   - Yes
   - No

22. D. Is your group a community organization?

1. Is your group a political organization? (ex. Young Anarchists of Quebec)
   - Yes
   - No

23. E. Is your group a community organization?

1. Is your group a local or chapter of a union?
   - Yes
   - No

24. A. The Government of Quebec's Criteria for funding community groups

1. Is the group community based, meaning it works with the community, for the community?
   - Yes
   - No
4. How would you describe the experience?

- Useful
- Useful but difficult
- Difficult
- Other (please specify)

34. **B. Tell us about your 2nd most important network**

1. Please name another network, regroupement, coalition, federation, association, table de concertation or table de quartier that the group is a part of

2. How long has the group been a member?

- Less than a year
- 1-3 years
- 4-6 years
- 6-10 years
- More than 10 years

3. Compared to other members, how active are you in this group or network?

- Very active
- Average
In the Know: Identifying multiple aspects of Québec’s community sector

4. How would you describe the experience?

- Useful
- Useful but difficult
- Difficult
- Other (please specify)

35. C. Tell us about your 3rd most important network

1. Please name a network, regroupement, coalition, federation, association, table de concertation or table de quartier that the group is a part of

2. How long has the group been a member?

- Less than a year
- 1-3 years
- 4-6 years
- 6-10 years
- More than 10 years

3. Compared to other members, how active are you in this group or network?

- Very active
- Average
- Not very active
If not very active, why not?

4. How would you describe the experience?

☐ Useful

☐ Useful but difficult

☐ Difficult

Other (please specify)

36. Thanks for your help!

Thanks for helping the Centre for Community Organization (COCo) develop a better understanding of the ethnocultural, bilingual and English-speaking groups in Quebec and their relationships with the provincial government.

If you're interested in talking with someone from COCo about your group and how we might support the work you're doing, give us a call at 514 849-5599, 1 866 552-2626 or write Sarah at sarahb@coco-net.org.

Two more questions before you go...

1. Would you like to receive a copy of the final report by email?

☐ Yes

☐ No

which email address?

2. COCo sends out a monthly electronic newsletter highlighting shifts in the community sector, publicizing events, job-postings etc.

Would you like to receive COCo's monthly community e-bulletin?

☐ Yes

☐ No
☐ I already receive the e-bulletin

Which email address should we add? [ ]
ANNEX II

LITERATURE REVIEW
To help us fully understand what is known about ethno-cultural, bilingual and English-speaking community groups, their relationship with the Québec government and the challenges in doing this type of research, a review of the literature was undertaken to clarify the basic concepts that inform the work. The following are the basic themes found in the research.

Little is known about the community sector

The community sector is large and diverse. It is not defined consistently and is not well documented. There are still many gaps in our understanding of it. This is true of the sector in the Western World, Canada, and in Québec (Brock, 2003; Alliance de recherche universités-communautés en économie sociale, 2006; Scott, 2003; White, 2001; White et al, 2008). For example, the evaluation of the implementation of the Politique de reconnaissance et de soutien à l’action communautaire carried out by Ms. Deena White and her research team at the University of Montréal (2008) mentions that there are community actors who are little or not at all known by the government.

The size of the sector is itself difficult to determine. In 2003, COCo attempted to estimate the number of community groups working in English in Québec. At that time it was hypothesized that the figure was at least 2,500 (COCo, 2003). This was based on comparing quantitative data from various sources. We know that the non-profit sector in Québec is larger than any other province (per capita). We also know that many of these organizations are not defined as community organizations using the Politique de reconnaissance et de soutien de l'action communautaire definition. Many are classified as sports and recreation groups (L'alliance de recherche universités - communautés en économie sociale, 2006). We also know there are over 50,000 non-profit organizations in Québec registered with the Inspecteur Générale (other non-profits are registered with the Federal Government) and approximately 4000 non-profits are funded through core funding by diverse ministries in the Québec government with another 1000+ funded by various ministries via service and project funding (Ministère de l'Emploi et de la Solidarité sociale, 2007).

Not knowing the actual number of groups we are trying to reach, who they are, and their contact information made the outreach for the survey difficult. Therefore one key element of the research was to use the questionnaire to develop a portrait and contribute to a basic understanding of parts of the sector.

There is little acknowledgement and even less knowledge about the similarities and distinctions or differences between ethno-cultural, bilingual and English-speaking community groups and Francophone community groups in Québec

For the most part, the particularities or distinctions of ethno-cultural, bilingual and English-speaking community groups in Québec are not acknowledged. White et al (2008) note this lack and see these groups, along with other non-recognized Francophone groups, as little or not at all known. In speaking about the relationship between the state and community organizations in the area of health and social services, Jette (2008) refers to the fact that there is a lack of acknowledgement of English-speaking or ethno-cultural differences. COCo, in its proposal for funding this research, spoke about ‘les groupes communautaires
"invisibles" (invisible community groups). ‘Les autres communautaires’ (the other community groups) is a term that surfaced during the research project to describe the many parts of the community sector in Québec, which are invisible to some but very visible and active in their local settings.

Identifying what the differences and distinctions are, as well as the similarities with the broader Francophone organizations, is a first step to understanding these ‘autres communautaires’. Without this information it is difficult to encourage the full participation of these ‘autres communautaires’ in the broader Québec community movement.

The English-speaking population is interested in inclusion and belonging to Québec society

In writing about the evolution of Québec’s English-speaking community, Jedwab (2004) traces the history of the Anglophone population from having to (individually and collectively) renegotiate its minority status of the 1970’s to its current position where it is a broader community that includes ethno-cultural communities that use English as their first official language spoken (with French or English as the two choices). This English-speaking community is interested in inclusion and belonging in Québec society. Other recent research has shown that English-speaking youth want to stay in Québec, contribute to Québec society, be bilingual and foster better relations with Francophone youth (Québec Community Groups Network, 2009). Artistic organizations working in ‘non-specifically European traditions’ (the majority not using French as their first language) also wants to be included and recognized in Québec. A coalition of groups lament the fact that the government strongly insists on the intercultural aspect of Québec society, but this recognition is not translated into the practice of a just policy that would fund cultural community artists equally (Stand Firm, 2008).

However, the lack of knowledge about the English-speaking community groups makes it hard to know how to move specifically towards inclusion and belonging.

The ethno-cultural, bilingual and English-speaking communities of Québec are not one community that can nor should speak collectively.

Each cultural community has its own unique history and the English-speaking community has historically not spoken as one voice (Jedwab, 2001; QCGN, 2007). This is not uncommon among cultural communities. Speaking as one voice is not necessarily desired. What is needed is an understanding of how the state functions and an ability to participate, appropriately and in a desired fashion, with the broader community sector. This also requires that the state has an understanding of the diversity and complexity of these ‘autres communautaires’.

Québec has a well-structured and funded community sector that is exemplary in the Western World yet having some important challenges to overcome

Québec has more non-profits per capita than any other province in Canada and a large proportion of the funding for these groups comes from the Québec government (L’Alliance de recherche universités-communautés en économie sociale, 2006). The Politique de l’action communautaire autonome outlines one of the most progressive and sophisticated state-third sector relations in Canada (White, 2001). It is distinctive and very progressive within the rest of the Western world (Sotomayor & Lacombe, 2006; White et al, 2008). This is to be applauded. The hard work over the years that went into making this possible needs to be acknowledged.
However, our experience at COCo suggests that ethno-cultural, bilingual and English-speaking community groups do not, by and large, benefit from this policy. Moreover, an evaluation of the Politique (White et al, 2008) identified some important questions that reflected our experience at COCo; suggesting there are some important challenges to overcome in the Politique. These include:

- The Politique is simply a policy, not law. Therefore government departments are not required to fulfill it (White et al, 2008). This leaves the door open for discrepancies in implementation of the Politique.

- The sectorization of groups (being attached to a ministry) makes it hard for groups that don’t define themselves as ‘single issue’ organizations to find a home ministry (White et al, 2008).

- Many organizations simply don’t fit the criteria to be attached to a ministry. One example of this is L’Autre Montréal, an organization that promotes education about social issues and their history through organizing bus tours (Charest, 2004).

- Access to funding is uneven among groups (White et al, 2008). COCo’s understanding is that groups that were not involved in the beginning phases of the implementation of the Politique (early 2000’s), have been, for the most part, left ‘out in the cold’ for funding.

- Groups need to be better informed about the Politique and the criteria (White et al, 2008). At COCo we continually speak with groups that don’t know the Politique exists. There is no official English version of it.

There are also concerns raised that, despite the progressive nature of the funding, community groups can become an extension of the state (Shragge, 2009, p. 57) and community work can become less mobilizing and less political (Lachapelle, 2007).

The Québec community sector is also well-structured and institutionalized (Deslauriers & Paquet, 2003). While this raises challenges for any group to find the time for table, regroupement, and coalition meetings (RIOCM, 1998), for ethno-cultural, bilingual and English-speaking community groups simple inclusion in these structures appears to be a problem. COCo’s experience suggests that a lack of basic information about where to participate and a lack or limited ability to work in French can lead to groups not being connected to the broader sector. Is this true? Do ethno-cultural, bilingual and English-speaking community groups participate in tables, regroupements, and coalitions? Do these groups access funding through a home ministry? What is the portrait of ethno-cultural, bilingual and English-speaking community groups in Québec? How are they different yet similar to Francophone community organizations? Do they want to be active partners in the Québec community sector? What are the specific challenges to integration that they face and how can they be overcome? This research set out to explore these questions in detail.
ANNEX III

IN THE KNOW- Regional Profiles

REGION: Montréal
146 of 290 respondents work in the Montréal region.
Survey completed in year 1 (2009)

595,920 people (32.7%) report English as their first official language spoken (FOLS) out of a population of 1,823,905

Mostly directors/coordinators answered the survey: 91 of 129 respondents (71%) are the director/coordinator of the group and 1 respondent is staff. 30 of 129 respondents (23.3%) answered “Other” to this question. Some of these answers included “coordinator” or “president”.

Organizational Profile

Health and Social Services and Immigration and Cultural Communities are the primary sectors of work: 35 of 121 reporting groups (29%) work primarily in the Health and Social Services sector, while 28 of 121 (23.1%) groups work primarily in the Immigration and Cultural Communities sector.

Families and youth/seniors are the primarily populations served: 28 of 124 groups (22.6%) work primarily with families, 22 of 124 (17.7%) work primarily with youth, and 19 of 122 (15.6%) work primarily with seniors. 15 out of 124 groups (12.1%) work primarily with women. 8 out of 124 groups (6.5%) work primarily with students and 8 groups work primarily with LGBTQ people.

Relatively small and long-standing groups: 66 of 131 groups (50.4%) have between 1-5 full-time employees, while 31 out of 131 groups (23.7%) have no full time employees. 56 of 124 groups (45.2%) have between 1-5 part-time employees while 34 out of 124 groups (27.4%) have no part-time employees. 99 of 145 (68.3%) groups have existed for 11 years or more. 20 out of 145 (13.8%) groups have existed between 6 and 10 years.

Montréal groups are largely not-for-profit and many have charitable status: 130 of 146 groups (89%) are not-for-profit; 82 of 130 groups (63.1%) have charitable status.

Language

Groups are largely bilingual: 114 of 145 groups (78.6%) work mostly in English or English and French. 122 of 146 reporting groups (83.6%) are very competent in reading and writing in English while 132 groups (90.4%) are very competent and providing services in English. 94 of 145 groups (64.8%) are very competent
in reading and writing French, while 103 groups (71%) are very competent in providing services in French. A significant minority of Montréal groups work in another language: 52 of 145 groups (35.9%) also work in a third language (mostly Spanish and Arabic).

**Funding**

Montréal groups have varied funding from non-Government of Québec sources: 84 of 111 groups (75.7%) receive funding through in-kind support and 86 of 116 (74.1%) receive funding through independent fundraising. 74 of 105 groups (70.5%) receive funding from fees for products and services, 76 of 113 groups (67.3%) from the municipal government, 72 out of 116 reporting groups (62.1%) from the federal government and 69 out of 113 reporting groups (61.1%) from foundations.

A number of groups do not receive Québec project funding or global mission funding: 70 of 128 groups (54.7%) receive project funding from the Québec government; 58 of 128 (45.3%) do not. 51 of 127 reporting groups (40.2%) receive global mission funding from the Québec government while 69 of 127 reporting groups (54.3%) do not. 7 groups (5.5%) do not know.

**Networks**

Groups are involved in networks, with both short and long histories of involvement. A high percentage of reporting groups are averagely to very active in the networks. A high percentage of groups find the network connection to be useful: 115 of 145 groups (79.3%) are involved with one network, while 83 of 144 groups (57%) and 60 out of 144 reporting groups (42%) are involved with a second and third network respectively.

41 out of 113 reporting groups (36.3%) have been involved in the first network listed for more than 10 years, and 26 out of 113 groups (23%) have been involved for between 1-3 years. 23 out of 81 groups (28.4%) have been involved in the second network listed for more than 10 years, and 23 groups have been involved in the second network for between 1-3 years. 22 out of 58 groups (37.9%) listing a third network have been involved for 1-3 years and 15 out of 58 groups (25.9%) have been involved for more than 10 years.

A high percentage of reporting groups are averagely to very active in the networks: 101 out of 115 groups (87.8%) for those listing a first network, 63 out of 83 (76%) for those listing a second network, and 51 out of 59 groups (86.4%) for those groups listing a third network.

A high percentage of groups find the network connection to be useful: 79 out of 107 reporting groups (73.8%) for those listing a first network, 59 of 79 groups (74.7%) for those listing a second network and 44 of 57 groups (77.2%) for those listing a third network.

**Networks named**

15 pan-Canadian network affiliations:

Alzheimer Society of Canada
Boys and Girls Club of Canada
Canadian AIDS Society (2x)
Canadian AIDS Treatment Information Exchange

IN THE KNOW - Regional Profiles

REGION: Laval
18 of 290 respondents work in the Laval region.
Survey completed in year 1 (2009).

68,460 people (18.8%) report English as their first official language spoken (FOLS) out of a population of 364,625

Source: CHSSN 2009-2010 Geographic Profiles. www.chssn.org

Mostly directors/coordinators answered the survey: 11 of 15 respondents (73.3%) are the director/coordinator of the group.

Organizational Profile

Health and Social Services is the primary sector of work: 7 of 13 groups (53.8%) work primarily in Health and Social Services, 2 of 13 reporting groups (15.4%) work primarily in Employment and Social Reinsertion, 1 group works primarily in the Immigration and Cultural Communities sector, 1 group in Education, 1 group in Local Regional Development and 1 group in Advocacy.

Seniors, people with disabilities, families and women are the populations primarily served: 5 of 17 groups (29.4%) work primarily with seniors, 3 of 17 groups (17.6%) work primarily with people with disabilities and 3 out of 17 groups work with families. 3 out of 17 groups work primarily with women. 1 group works primarily with students, 1 group with people with mental health difficulties and 1 group works primarily with men.

Groups are very small and long-standing: 8 of 18 reporting groups (44.4%) have between 1-5 full-time employees, 6 of 18 groups (33.3%) have “0” full-time employees. 7 of 18 (38.9%) groups have between 1-5 part-time employees, 8 of 18 (44.4%) groups have “0” part-time employees.

14 of 18 reporting groups (77.8%) have existed for 11 years or more.

Laval groups are not-for-profit and many have charitable status: 17 of 18 groups (94.4%) are not-for-profit, while 10 of 17 (58.8%) have charitable status.

Language

Groups are primarily French-speaking; services and abilities in English are functional: 12 of 18 groups (66.7%) work primarily in French. 5 of 18 reporting groups (27.8%) work primarily in English or English and French. 9 of 18 groups (50%) are somewhat able in their abilities to read and write in English and 11 of 18 groups (61.1%) are somewhat able to provide services in English, whereas 14 of 18 (77.8%) groups are very
competent in reading and writing French and providing services in French. 6 of 18 (33.3%) groups also work in a third language (Creole, Spanish, Sign Language).

Funding

**Laval groups have a wide source of non-Government of Québec funding:** 12 of 17 groups (70.6%) receive funding from independent financing campaigns and 10 of 17 (58.8%) receive funding from the federal government. 9 out of 17 groups (53%) receive funding from the municipal government and from in-kind support while 8 out of 16 reporting groups (50%) receive funding from fees for products/services.

**A large percentage of groups receive Québec project funding and global mission funding:** 12 of 17 groups (70.6%) receive project funding from the Québec government. A high percentage of groups also receive global mission funding: 13 out of 17 reporting groups (76.5%). 4 groups (23.5%) do not receive global mission funding.

Networks

**Groups are involved in networks, with a medium to long history of involvement:** 14 of 18 reporting groups (78%) are involved with one network, while 12 of 18 groups (65%) and 9 of 18 groups (50%) are involved with a second and third network.

5 out of 12 groups (42%) listing involvement in a first network have been involved for more than 10 years, while 4 out of 12 groups (33%) have been involved from between 6-10 years. 8 out of 12 groups (66%) listing a second network connection have been involved for 4-10 years. 2 out of 9 reporting groups (22%) have been involved in a third network for each of the following lengths of time: 1-3 years, 4-6 years, 6-10 years or more than 10 years.

Most of the groups are averagely to very active in their networks: 12 out of 14 groups (85.7%) naming a first network, 10 out of 12 groups (83.3%) naming a second network and 6 out of 9 groups (66%) listing a third network connection.

The majority of Laval groups find the network connection useful: 9 out of 13 groups (69.2%) listing a first network, 10 out of 11 (91%) groups listing a second network and 6 out of 8 groups (75%) listing a third network.

IN THE KNOW - Regional Profiles

REGION: Estrie
21 of 290 respondents work in Estrie.
Survey completed in Year 1 (2009).

23,580 people (8%) report English as their first official language spoken (FOLS) out of a population of 293,955 in the region.

Mostly directors/coordinators answered the survey, but a variety of other people also took part: 15 of 21 respondents (71.4%) are the director/coordinator of the group. 2 respondents are staff members, 2 are volunteers and 2 are collective members.

Organizational Profile

Education is the primary sector of work, but a variety of sectors are identified: 5 of 17 reporting groups (29%) work in Education. 3 of 17 groups (18%) work in Health and Social Services and 1 group (5.9%) works primarily in each of the following sectors: Immigration and Cultural Communities, Advocacy and the Arts.

A variety of populations served are identified: 3 of 11 (27%) reporting groups work primarily with seniors, while 3 groups work with families. 2 of 11 groups (18%) work primarily with people with mental health issues. 2 out of 7 reporting groups (28.6%) work with youth and 2 groups work with students.

Relatively small and long-standing groups: 12 of 17 reporting groups (71%) have between 1-5 full-time employees; 7 of 15 reporting groups (46.7%) have between 1-5 part-time employees while 3 of 15 groups (20%) have between 5-10 part-time employees. 5 of 20 reporting groups (25%) have 20-50 volunteers while 3 of 20 groups (15%) have 5-10 volunteers.

15 of 19 groups (78.9%) have existed for 11 years or more.

Estrie groups are largely not-for-profit and many have charitable status: 16 of 20 groups (80%) are not-for-profit, 11 of 16 (68.7%) have charitable status.

Language

Groups are largely English-speaking with very strong ability to provide services in English. French is more limited: 16 of 20 reporting groups (80%) work primarily in English or English and French. 18 of 20 groups (90%) are very able in their abilities to read and write in English, and 19 of 20 groups (95%) are very able to provide services in English. 10 of 20 groups (50%) are very competent in reading and writing French and 13 of 20 groups (65%) are very able providing services in French. 7 out of 20 groups (35%) are somewhat
able to provide services in French while 9 out of 20 groups (45%) are somewhat able to read and write in French.

Funding

**Estrie groups have a wide source of funding from non-Government of Québec sources:** 10 of 13 (76.9%) reporting groups receive funding from independent fundraising, 10 of 14 reporting groups (71.4%) receive in-kind financial support, and 9 of 13 (69.2%) from fees for products/services. 10 of 15 (66.6%) groups receive funding from the federal government, and 9 of 14 (64.2%) from foundations. 1 of 4 groups (25%) receives financing from the municipal government.

**Many groups receive Québec government project funding but many do not receive global mission funding:** 9 of 15 (60%) groups receive project funding from the Québec government. 6 out of 15 reporting groups (40%) receive global mission funding while 6 groups do not. 3 groups (20%) answered that they do not know.

Networks

**Groups are involved in networks, with either a short or a fairly long history of involvement, and a wide range of level of activity in the networks:** 18 out 20 reporting groups (90%) are involved with one network, while 16 out of 20 reporting groups (80%) and 15 out of 20 reporting groups (75%) are involved with a second and third network.

Many groups have been involved in networks for more than 10 years: 9 out of 17 reporting groups (52.9%) listing a first network, 6 out of 14 reporting groups (42.9%) indicating involvement in a second network and 4 out of 14 reporting groups (28.6%) listing a third network affiliation. On the other hand, a number of groups have also been involved for 1-3 years: of those groups listing a second network, 4 out of 14 groups (28.6%), and of those listing a third network, 5 out of 14 reporting groups (35.7%).

A high percentage of groups are either averagely active or very active in all networks named: for the first network named, 16 out of 18 reporting groups (88.9%), for the second network 10 out of 14 reporting groups (71.4%) and for the third network named, 10 out of 13 groups or 77%.

A high percentage of all groups find the network connections very useful: 14 out of 17 groups (82.3%) for the first network named, 9 out of 10 (90%) for the second network named and 10 out of 11 groups (91%) for the third network named.

IN THE KNOW - Regional Profiles

REGION: Outaouais
10 of 290 respondents work in the Outaouais region.
Survey completed in year 2 (2010).

58,720 people (17.4%) report English as their first official language spoken (FOLS) out of a population of 338,185

Source: CHSSN 2009-2010Geographic Profiles. www.chssn.org

Mostly directors/coordinators answered the survey: of 9 respondents, 6 (66.7%) are the director/coordinator of the group, 2 are board members and 1 is staff.

Organizational Profile

A wide variety of sectors and populations are served: of 9 reporting groups, 2 (22.2%) work primarily in Health and Social Services and 2 work with Immigration and Cultural Communities. 1 group (11.1%) works primarily in each of the following sectors: Arts, Cooperatives, Education, Environment and Advocacy. Of 5 reporting groups, 2 (40%) work primarily with women and 1 (20%) works primarily with each of the following populations: children, families, and the unemployed.

Relatively small (with more full-time than part-time employees) and medium to long-standing groups: of 8 reporting groups, 6 (75%) have between 1-10 full-time employees; of 7 reporting groups, 6 (85.8%) have between 0 and 5 part-time employees.

Of the 9 groups responding to the question about length of time of existence, 4(44.4%) have existed between 2 and 10 years, while 5 groups (55.6 %) have existed for 11 years or more.

Outaouais groups are not-for-profit and many do not have charitable status: 9 out of 10 groups (90%) are not-for-profit; 5 out of 9 reporting groups (55.6 %) do not have charitable status, while 3 out of 9 groups (33.3%) do. 1 group doesn’t know.

Language

Groups are split between English-speaking and French-speaking, but stronger in English: 4 out of 9 reporting groups (44.4%) work mostly in English, and 4 groups work mostly in French. Of 8 reporting groups, 6 (75%) are very capable in reading and writing English while 5 (62.5%) are very capable of providing services in English. Of 8 reporting groups, 4 (50%) are very competent in reading and writing French and 3 (37.5%) are very capable of providing services in French.
Funding

**Outaouais groups have important sources of funding from non-Government of Québec sources:** of 7 reporting groups, 6 (85.7%) receive funding through in-kind support while out of 6 reporting groups, 5 (83.3%) receive funding through independent fundraising. 5 out of 8 reporting groups (62.5%) receive funding from the federal government 4 out of 7 reporting groups (57%) receive funding from the municipal government.

A **significant number of groups do not receive Québec project funding or global mission funding:** of 9 reporting groups, 5 (55.6%) do not receive project funding from the Québec government while 4 (44.4%) do. Of 8 reporting groups, 5 (62.5%) do not receive global mission funding from the Québec government, while 3 groups do (37.5%).

Networks

**Outaouais groups are involved in many networks, with both short and medium length histories of involvement; although most of the involvement is useful, some is difficult:** 7 of the 10 groups (70%) are involved in two networks, while 5 of the 10 groups (50%) are involved in a third network.

Of 7 groups naming a first network connection, 4 (57%) have been involved in the network for 4-6 years, while 2 (28.6%) have been involved for more than 10 years. A number of groups have short term involvement (1-3 years) in the second and third network: 3 out of 7 groups (42.9%) naming a second network contact, and 1 out of 5 groups (20%) naming a third network contact. Many of the groups have medium length involvement (4 years and more) in all three networks: 6 of 7 groups (85.7%) for the first network named, 4 of 7 groups (57.2%) for the second network named and 4 of 5 groups (80%) for the third network named.

Groups are either averagely or very active in all three networks: all 7 groups mentioning a first network contact are either averagely or very active in the network. 6 out of 7 (85.7%) groups listing a second network connection are either averagely or very active and 3 out of 4 groups (75%) listing a third network contact are averagely or very active.

Most groups find the network connections to be useful: 4 out of 7 groups (57%) listing a first network, 6 out of 6 groups listing a second network, and 3 out of 5 groups (60%) listing a third network. A significant minority find their participation to be useful but difficult: 3 of 7 groups (42.9%) in the listing a first network and 2 out of 5 groups (40%) listing a third network.

IN THE KNOW - Regional Profiles

REGION: Montérégie
7 of 290 respondents work in the Montérégie region.
Survey completed in year 2 (2010)

143,645 people (10.7%) report English as their first official language spoken (FOLS) out of a population of 1,339,790

Source: CHSSN 2009-2010 Geographic Profiles. www.chssn.org

A variety of people answered the survey: 3 of the 6 respondents are staff, 2 are the director/coordinator, and 1 is a board member.

Organizational Profile

Health and Social Services and Cultural Communities are the primary sectors of work; a variety of populations served: 3 of 7 groups (42.9%) work primarily in either Health and Social Services or Immigration and Cultural Communities. 1 group (14.3%) works primarily in Advocacy. 2 of 6 reporting groups (33%) work with each of the following populations: refugees and families. 1 group works primarily with either women or people with mental illness.

Small groups with solid volunteer participation. Groups have been in existence for a long period of time: 5 of 7 reporting groups (71.4%) have 1-5 part-time employees while 6 of 7 reporting groups (85.7%) have between 1-10 full-time staff. 6 of 7 groups (85.7%) have between 10 – 50 volunteers.

6 of 7 groups (85.7%) have existed for more than 11 years.

Montérégie groups are not-for-profit and many of them have charitable status: all 7 groups are not-for-profit, while 5 of 7 groups (71.4%) have charitable status.

Language

Groups use French more than English, with reading and writing skills in both languages only moderate to good. Spanish is another language used: 5 out of 6 reporting groups (83.3%) function either primarily in French or in English and French. Of these 6 groups, 5 (83.3%) are very able to provide services in English, while 4 (66.7%) are very able to provide services in French. Of 6 reporting groups, 3 are very able to read and write in English and French, while 3 are somewhat able. Of 7 reporting groups, 4 (57.1%) function in other languages, primarily Spanish.
Funding

**Montérégie groups have diverse sources of non-Government of Québec funding:** of 7 reporting groups, 6 (85.7%) receive funding from independent fundraising, while 5 (71.4%) receive funding from each of the following sources: fees for products and services, in-kind support, foundations or the federal government.

**A high percentage of groups receive project and global mission funding from Québec:** 5 of 7 groups (71.4%) receive project funding from the Québec government, while 6 of the 7 groups (85.7%) receive global mission funding. 1 group (14%) does not receive global mission funding.

Networks

**Groups are weak in terms of belonging to more than one network:**
Of 7 groups, 5 (71.4%) belong to one network, while 2 groups (28.5%) belong to both a second and third network.

For 5 out of 5 reporting groups participating in the first network and 2 out of 2 reporting groups participating in a second and third network, the length of time of participation is more than 4 years.

For the first network named, 1 out of 3 reporting groups (33.3%) has been very involved, while the 1 out of 3 groups each has been either averagely involved or not very involved. The 2 groups reporting for the second and third networks have been averagely involved in each of these networks.

2 out of 5 (40%) groups naming a first network, 1 out of 2 (50%) groups naming a second network and 2 out of 2 groups naming a third network find the connection to be useful.

REGION: Abitibi -Témiscamingue
2 of 290 respondents work in the Abitibi -Témiscamingue region.
Survey completed in year 2 (2010).

5,355 people (3.8%) report English as their first official language spoken (FOLS) out of a population of 141,870.

Source: CHSSN 2009-2010 Geographic Profiles. www.chssn.org

Staff answered the survey: the 2 respondents identified themselves as staff.

Organizational Profile

Groups work primarily in Health and Social Services and Advocacy sectors; primary population(s) served is aboriginal people: one group works primarily in the Health and Social Services sector. The other works primarily in Advocacy. One group works primarily with aboriginal people.

Very small groups with some strong volunteer participation; medium to lengthy existence: one group has between 1-5 full-time employees; one group has “0” part-time employees. One group has between 20-50 volunteers.

One group has been in existence for 6-10 years. The other group has existed for 11 years or more.

Abitibi -Témiscamingue groups are not-for-profit and do not have charitable status (or don’t know if they do): both groups are not-for-profit. One group does not have charitable status and the other answered “not sure”.

Language

English more prominent than French as working language: one group works primarily in English, the other works in English and French. Only one group answered the more detailed questions about language: this group is very capable in reading and writing and providing services in both English and French.

Funding

Abitibi –Témiscamingue groups receive non-Government of Québec funding; neither receives project funding or global mission funding from the Québec government: 2 of the 2 reporting groups receive funding from the federal government, while one group also receives funding from in-kind support and independent fundraising. Neither group receives project funding or global mission funding from the Québec government.
Networks

Only one group answered the question about network affiliations: one group answered the questions about networks and is involved in three networks. The group has belonged to the first network for 6-10 years and the second from 1-3 years. The group is very active in both networks and finds both networks to be useful. The group has been active in a third network for 4-6 years, but is only averagely active in the network and finds it useful but difficult.

IN THE KNOW - Regional Profiles

REGION: Capitale Nationale
12 of 290 respondents work in the Capitale Nationale region.
Survey completed in year 2 (2010).

1.8% (11,845) people report English as their first official language spoken (FOLS) out of a population of 649,605 in the region.

A variety of people answered the survey: 5 of 12 respondents (41.7%) are staff, while 4 (33.3%) are the director/coordinator of the group. 3 of the respondents (25%) are board members.

Organizational Profile

Immigration and Cultural Communities are the primary sector of work; families and women are the primary populations served: 8 of 11 reporting groups (72.7%) work primarily in the Immigration and Cultural Communities sector, while 1 group (9.1%) works primarily in each of the following sectors: the Arts, Health and Social Services and Education. Of the 2 groups reporting to the question about populations, 1 works primarily with families and the other with women.

Very small groups with an emphasis on full-time staff and volunteers. Groups have been in existence for a long period of time: of 10 reporting groups, 8 (80%) have between 0-5 full-time employees while of 8 reporting groups, 2 (25%) have between 1-5 part-time staff. Of 9 groups reporting, 3 (33.3%) have between 20 and 50 volunteers, while 2 (22.2%) have more than 100 volunteers.

Of 10 reporting groups, 8 (80%) have existed for more than 11 years.

Capitale Nationale groups are not-for-profit and many of them do not have charitable status: 11 of 12 reporting groups (91.7%) are not-for-profit, while of 11 reporting groups, 8 (72.8%) either do not have charitable status or do not know if they have charitable status.

Language

Groups work mostly in French, with poor to strong English: of 11 groups reporting, 9 (81.8%) groups function primarily in French. 7 out 7 reporting groups are very able to provide services in French and 8 out of 8 reporting groups are very able to read and write in French. Of 8 groups reporting, 3 (37.5%) are very able to provide services in English and to read and write in English, 2 (25%) are somewhat able, and 3 (37.5%) are not at all able.

Funding
Capitale Nationale groups receive support from non-Government of Québec sources: of 8 reporting groups, 5 (62.5%) receive funding from municipal government and 5 (62.5%) receive funding from in-kind support. Of 7 reporting groups, 3 (42.9%) receive funding from foundations.

Many groups do not receive project or global mission funding from the Québec government: of 10 groups reporting, 6 (60%) groups do not receive project funding from Québec, while 8 (80%) do not receive global mission funding or don’t know. 2 groups (20%) do receive global mission funding.

Networks

Groups are weak in network connections, have been involved for a variety of lengths of time and level of participation in networks varies: of 9 groups reporting, 3 (33.3%) belong to one network, while 2 (22%) belong to a second network. There is no third network activity reported.

Of the 3 groups reporting about participation in the first network mentioned, 1 (33.3%) has been involved for 1-3 years, 1 for 6-10 years, and another group for more than 10 years. For the second network, of 2 groups reporting, 1 (50%) has been involved for 1-3 years and the other, for 6-10 years.

For the first network, of 3 groups reporting, 2 (66.6%) are very active while 1 (33.3%) is averagely active. For the second network, 1 of 2 groups reporting (50%) is somewhat active while the other is not very active.

For the two networks, of 2 groups reporting, 1 group finds the connection useful and the other finds the connection useful but difficult.

IN THE KNOW - Regional Profiles

REGION: Laurentiens
4 of 290 respondents work in the Laurentiens region.
Survey completed in year 2 (2010).

33,170 people (6.6 %) report English as their first official language spoken (FOLS) out of a population of 506,080

Source: CHSSN 2009-2010 Geographic Profiles. www.chssn.org

Mostly directors/coordinators answered the survey: 3 out of 4 (75%) respondents are the director/coordinator of the group.

Organizational Profile

Health and Social Services is the primary sector of work; refugees, seniors and families are the populations primarily served: of 4 reporting groups, 2 (50%) work in Health and Social Services, and 1 (25%) works primarily in each of the following sectors: Immigration and Cultural Communities and Employment and Social Reinsertion. Of 3 reporting groups, 1 group (33.3%) works primarily with each of the following populations: refugees, seniors, and families.

Groups are small and have been in existence either for a relatively short or long period of time: 2 out of 3 groups (66.7%) have between 1-5 full-time employees, and all 3 groups have between 0 and 10 part-time employees.

Of 4 reporting groups, 2 (50%) have existed for 5 years and less, while 2 (50%) have existed for 11 years or more.

Laurentiens groups are not-for-profit and half of them have charitable status: all 4 groups are not-for-profit, while half (2 groups) have charitable status.

Language

Groups are split between English and French with slightly stronger abilities in French: of 4 reporting groups, half work primarily in English, and half work primarily in French. Of 4 reporting groups, 3 (75%) are very competent in reading and writing English and providing services in English, while 3 (75%) are very competent in reading and writing French and all 4 (100%) are very competent in providing services in French.

Funding

Laurentiens groups have important sources of funding from non-Government of Québec sources: of 4 reporting groups, 3 (75%) receive funding from the federal government, while 2 (50%) receive funding either
through independent fundraising or foundations. 1 of 4 groups (25%) receives funding through each of the following sources: fees for products and services, municipal government and in-kind support.

**A significant number of Laurentiens groups receive Québec project funding while half receive global mission funding:** of 4 reporting groups, 3 (75%) receive project funding from the Québec government. 2 of 4 groups (50%) receive global mission funding while 2 groups do not.

**Networks**

Groups are involved in three networks, for a variety of length of time. Many groups find the connections useful, but also sometimes difficult: of 4 reporting groups, all are involved in at least two networks, while half (2) are involved in a third network.

The average length of time involved in the first network named is evenly split: 1 of 4 groups (25%) has been involved for between less than one year, 1 group for 1-3 years, 1 group for 4-6 years and 1 group for more than 10 years. For the time involved in the second network, of 4 reporting groups, half (2 groups) have been involved for 1-3 years, while 1 group each has been involved for less than a year or 4-6 years. For the third network named, 1 of the 2 reporting groups has been involved for less than one year and 1 group has been involved for 6-10 years.

Groups are either averagely or very active in the first two networks: 4 out of 4 groups for the first two networks. For the third network, 1 of 2 reporting groups is very active, while 1 group is not very active.

Most groups find the network connections to be useful: 3 out of 4 groups (75%) naming a first network connection, 2 out of 4 groups (50%) naming a second network and 1 out of 2 groups (50%) naming a third network. However, a significant minority find their participation to be useful but difficult: in the first network named, 1 of 4 reporting groups (25%), in the second network named, 2 of 4 groups (50%), and in the third network named, 1 of 2 reporting groups (50%).

IN THE KNOW - Regional Profiles

REGION: Lanaudière
2 of 290 respondents work in Lanaudière region.
Survey completed in year 2 (2010).

Data not available on percentage of English speakers.

A director/coordinator and a board member answered the survey: 1 of the 2 respondents is a board member and the other is the director/coordinator of the group.

Organizational Profile

Arts is the primary sector of work; populations served are not identified: one group works primarily in the Arts sector.

Very small groups that have been in existence for a long period of time: one group has between 1-5 full-time employees. One group has “0” part-time employees.

Both groups have existed for 11 years or more.

Lanaudière groups are not-for-profit and don’t have charitable status: both groups are not-for-profit and neither has charitable status.

Language

Groups are more French-speaking with weak English: for one group the primarily language of work is French, while for the other it is French and English. One of the groups is somewhat able or not at all able in reading and writing English and providing services in English, while both groups are very competent in reading and writing French and providing services in French.

Funding

Lanaudière groups have sources of non-Government of Québec funding, but these are limited; half of the groups receive Québec project funding and half receive Québec global mission funding: 1 of the 2 groups receives funding from the following sources: fees for products and services, the municipal government, and in-kind support.

One group receives project funding from the Québec government. 1 of the 2 groups receives global mission funding from Québec.
Networks

Lanaudière groups did not fill out information about network involvement.
IN THE KNOW - Regional Profiles

REGION: Chaudière Appalaches
2 of 290 respondents work in the Chaudière Appalaches region. Survey completed in year 3 (2011).

3705 people (1%) report English as their first official language spoken (FOLS) out of a population of 387,315

Source: CHSSN 2009-2010 Geographic Profiles. www.chssn.org

Directors/coordinators answered the survey: both respondents are the director/coordinator of the group.

Organizational Profile

Primary sector of work is Health and Social Services; populations served not indicated: only one of the two groups answered this question. This group’s main sector of work is Health and Social Services. Neither group answered the question about populations served.

Very small groups with an emphasis on volunteers. Groups have been in existence for a medium to long period of time: both groups have 1-5 staff (full-time and part-time). Both groups have between 21-50 volunteers.

Both groups have been in existence between 6-10 years.

Chaudière Appalaches groups are not-for-profit and do not have charitable status: both groups are not-for-profit and neither has charitable status.

Language

Groups are English-speaking groups, with very strong English and medium to strong French: both groups work mostly in English. Both groups are very capable of providing services and reading and writing in English, while only one group is very capable of providing services and reading and writing in French. The other group is somewhat able to provide services and to read and write in French.

Funding

Chaudière Appalaches groups receive a variety of support from non-Government of Québec sources: both groups receive funding from the following sources: federal government, foundations, independent fundraising, and in-kind support.

Both groups receive project funding while neither receives global mission funding from Québec: both groups receive project funding from the Québec government, but neither receives global mission funding from Québec.
Networks

Groups are involved for a medium length of time, with average to strong participation: both groups are involved in three networks.

The 2 groups have been involved in all three networks for an average amount of time: both groups have been involved either between 4-6 years or 6-10 years for the three networks.

One group is very active in all three networks, while the other group is averagely active in all three networks.

Overall, both groups find the network connections to be useful. However, 1 of the 2 groups finds the network connection for the first network named to be useful but difficult.

IN THE KNOW - Regional Profiles

REGION: Côte Nord
18 of 290 respondents work in the Côte Nord region.
Survey completed in year 3 (2011).

5635 people (5.9%) report English as their first official language spoken (FOLS) out of a population of 94,805. The bulk of the English-speaking community (and 16 out of the 18 survey respondents) live in the Lower North Shore area of Côte Nord. In this area there are 3610 people (66%) reporting English as their first official language spoken (FOLS) out of a population of 5465.

Source: CHSSN 2009-2010 Geographic Profiles. www.chssn.org

A variety of people answered the survey: 2 respondents are staff, 5 are the coordinator/director of the group, 3 are board members, 6 are volunteers, and 1 is a collective member.

Organizational Profile

Primary sector of work is Health and Social Services; youth and families are the populations primarily served: 5 of 11 reporting groups work primarily in Health and Social Services (45.5%). 1 group (9.1%) works primarily in each of the following sectors: Arts, Media and Technology, Cooperatives, Education, Regional and Local Development, and Employment and Social Reinsertion. Out 14 reporting groups, 6 (42.9%) work primarily with youth, 4 (28.6%) work with families while 2 groups (184.3%) work primarily with seniors and 1 group each (7.1%) works primarily with women or students.

A variety of sizes of groups with some strong volunteer participation; short to medium length of existence: 8 of 10 reporting groups (80%) have between 1-5 full-time employees, while 1 group (10%) has 11-20 full time employees. 5 out of 8 reporting groups (62.5%) have between 1-5 part-time employees, 1 group (12.5%) has “0” part-time employees, 1 group has between 21-50 part time employees, and 1 group has between 51-100 part-time employees. Of 16 reporting groups, 5 (31.3%) have between 1-5 volunteers, 7 (43.8%) have between 6-10 volunteers while 1 group (6.3%) has between 11-20 volunteers and 3 groups (18.8%) have between 21-50 volunteers.

Of 17 reporting groups, 7 (41.2%) have been in existence between 2-5 years and 9 (52.9%) have been in existence for 6 years or more. 1 group answered “I don’t know.

Over half of Côte Nord groups are grassroots organizations. All reporting groups do not have charitable status (or don’t know): of 17 groups reporting, 6 (35.3%) are not-for-profit, 1 (5.9%) is a cooperative, 1 (5.9%) doesn’t know, and 9 (52.9%) are grassroots. Of 6 groups reporting, 5 (83%) do not have charitable status and 1 group (16.7%) does not know.
Language

Groups are more English-speaking and much more functional in English than in French: 17 of 18 reporting groups (94.4%) work primarily in English or English and French. 16 of 17 (94.1%) reporting groups are very able to provide services in English and to read and write in English, 1 out of 17 (5.9%) is somewhat able in reading and writing and providing services in English.

1 out of 17 (5.8%) reporting groups is very able to provide services in French. 16 of 17 groups (94.1%) are somewhat or not at all able to provide services in French. 1 of 17 groups (5.8%) is very able to read and write in French while 16 of 17 groups (94.1%) are somewhat or not at all able to read and write in French.

Funding

Côte Nord groups receive a variety of non-Government of Québec funding: 5 out of 5 reporting groups receive funding from in-kind support and 4 out of 5 groups (80%) receive funding from independent fundraising. 2 of 3 reporting groups (66.6%) receive funding from either fees for products and services or from the municipal government. 1 of 3 groups (33.3%) receives funding from foundations. 1 group (out of 1 group reporting) receives funding from the federal government.

A large number of groups receive Québec government project funding; few receive Québec government global mission funding: 4 out of 5 reporting groups (80%) receive project funding from the Québec government. 2 of 6 reporting groups (33%) receive global mission funding, while 3 (50%) do not and 1 (16%) does not know.

Networks

Groups are active in networks, and length of time varies greatly. Most groups are either averagely or very active and find the network connections useful: 10 out of 18 (55.6%) reporting groups belong to a first network while 8 out of 18 groups (44%) named a second network. 5 of 18 reporting groups (27.8%) named a third network.

Of 9 groups naming a first network, 2 (22.2%) have been involved for less than a year, 2 (22.2%) have been involved for 1-3 years, 3 (33.3%) have been involved for 4-6 years, 1 (11.1%) has been involved for 6-10 years and 1 (11.1%) has been involved for more than 10 years. Of 8 groups naming a second network, 1 (12.5%) has been involved for less than a year, 4 (50%) have been involved for 1-3 years; 1 group (12.5%) has been involved for 4-6 years and 2 groups (25%) have been involved for 10 years or more. For those groups naming a third network, 2 of 5 groups (40%) has been involved for less than a year and 3 (60%) have been involved for 1-3 years.

Of 10 groups answering the question about level of participation in the first network mentioned, 9 (90%) are either averagely or very active. For those answering this question for the second network named, 7 out of 8 groups (87.5%) are either averagely or very active. Of the 5 groups naming a third network, 2 groups each (40%) are either very active or not at all active. 1 group (20%) is averagely active.

The majority of reporting groups find participation in all three networks useful: 7 out of 9 (77.8%) groups
naming a first network, 7 out of 7 (100%) groups naming a second network and 3 out of 4 groups (75%) naming a third network. 1 group finds participation in all three networks to be useful but difficult.

REGION: Iles-de-la-Madeleine
10 of 290 respondents work in the Iles-de-la-Madeleine region. Survey completed in year 3 (2011).

875 people (6.7%) report English as their first official language spoken (FOLS) out of a population of 12,105.

Source: CHSSN 2009-2010 Geographic Profiles. www.chssn.org

A wide variety of people answered the survey: of 6 respondents, 2 (33.3%) are the director/coordinator, 1 (16.7%) is staff, 2 are board members and 1 is a volunteer.

Organizational Profile

Local Regional Development is the primary sector of work; men and students are the primary populations served: of 4 reporting groups, 2 (50%) work primarily in Local Regional Development. 1 group (25%) works primarily in Health and Social Services and 1 works primarily in Education. Of 4 groups, 2 (33.3%) work primarily with men, and 2 primarily with students.

Small groups that have been in existence for a long period of time: 1 group answered the question about full-time employees: this group has between 6-10 full-time employees. Of 6 reporting groups, 6 have between 1-5 part-time employees. Of 9 reporting groups, 8 (88.9%) have between 6-10 volunteers and 1 (11.1%) has between 1-5 volunteers.

7 of 9 groups (77.8%) have been in existence for more than 11 years. 2 (22.2%) groups have been in existence for 6-10 years.

Iles-de-la-Madeleine groups are not-for-profit, but a significant minority are grassroots or associations and few have charitable status: 6 out of 9 groups (66.7%) are not-for-profit, 2 (22.2%) are grassroots, and 1 (11.1%) is an association. Of 6 groups answering the question about charitable status, 2 (33.3%) have it, while 4 (66.7%) do not.

Language

Groups are English-speaking groups, with very strong English and medium to poor French: 9 of 9 groups work primarily in English, are very able to provide services in English and are very able to read and write in English. 9 of 9 groups are only somewhat able or not at all able to provide services in French or read and write in French.
Funding

Iles-de-la-Madeleine groups receive a variety of support from non-Government of Québec sources: 5 of 5 groups receive in-kind financial support. 4 of 4 reporting groups receive funding from independent fundraising and fees for products and services.

Few groups receive project funding while most do not receive global mission funding from Québec: 3 out of 6 reporting groups (50%) receive project funding from the Québec government while 3 groups do not receive project funding. 5 of 6 groups (83.3%) do not receive global mission funding while 1 group (16%) does not know.

Networks

Groups do not have a high level of participation in networks; the amount of time involved in network varies from medium to lengthy time. Levels of participation range from not very active to very active: 7 of 10 groups (70%) are active in one network. 2 out of 10 reporting groups (20%) are active in a second network. No group reported being active in a third network.

Involvement in the first two networks has occurred for more than 4 years: for those groups naming a first network, 7 out of 7 groups have been involved for more than 4 years. For those groups naming a second network, 2 out of 2 groups have been involved for more than 4 years.

In terms of levels of participation, 4 out of 7 groups (57%) naming a first network connection have been averagely or very active. 2 out of 2 groups naming a second network connection have been averagely or not very active.

6 out of 7 groups (85.7%) find involvement in the first network useful, but 2 out of 2 groups find their second network connection useful but difficult.

IN THE KNOW - Regional Profiles

REGION: Gaspésie (Iles-de-la-Madeleine are reported on separately, Bas St Laurent included here)

9,015 people (.7%) report English as their first official language spoken (FOLS) out of a population of 120,575

There are small isolated English communities in these regions. The breakdown of the English speaking population is:

- CSSS Des Chaudières: 5155 people (16%) with English as their FOLS of a population of 32145
- CSS Percé: 820 people (4.8%) with English as their FOLS of a population of 17,045
- CSS Côte Gaspé: 2,600 people (13.5%) with English as their FOLS of a population of 19,220
- CSS Haute Gaspésie: figures not available, very few English as FOLS
- Bas St Laurent: 440 people (8%) with English as their FOLS of a population of 52,165.

Source: CHSSN 2009-2010 Geographic Profiles. [www.chssn.org](http://www.chssn.org)

Directors/coordinators answered the survey: 5 (83.3%) respondents are the director/coordinator of the group while 1 respondent is staff.

Organizational Profile

**Health and Social Services is the primary sector of work; seniors and families are the primary populations served:** 4 of 5 groups (80%) work primarily in Health and Social Services. 1 group (20%) works in Local Regional Development. 2 of 5 reporting groups (40%) work with seniors and 2 groups work with families. 1 group (20%) works with youth.

**Very small groups with an emphasis on volunteers. Groups have been in existence for a medium to long period of time:** 4 out of 4 groups have between 1-5 full-time employees. 4 out of 6 (66.7%) groups have 1-5 part-time employees. 2 (33.3%) groups have between 6-10 part-time employees. 3 out of 6 reporting groups (50%) have between 6-10 volunteers. 2 groups have between more than 21 volunteers, and 1 group has over 100 volunteers.

4 out of 6 groups (66.7%) have been in existence for more than 11 years. 2 groups (33.3%) have been in existence for 6-10 years.

**Gaspésie groups are not-for-profit and half do not have charitable status:** all 6 groups are not-for-profit. 3 of these groups (50%) have charitable status.
Language

Groups are predominantly English-speaking groups with very strong English and medium ability in French: 5 of the 6 groups work primarily in English (83.3%). 5 of the 6 groups are very able to provide services in English while all 6 groups are very able to read and write in English. 4 of the 6 groups (66.7%) are somewhat able to provide services in French while 5 of 6 groups (83.3%) are somewhat able to read and write in French.

Funding

Gaspésie groups receive a variety of support from Funding other than from the Government of Québec sources: all 6 groups receive funding from the federal government and in-kind financial support. 3 of 3 groups receive funding from foundations and independent fundraising while 3 of 4 groups (75%) receive funding from the municipal government.

Over half of the groups receive project funding while most do not receive global mission funding from Québec: 3 of 5 groups (60%) receive project funding and only 1 of 5 groups (20%) receives global mission funding. 4 out of 5 groups (80%) do not receive global mission funding.

Networks

Groups are involved in networks, the amount of time involved varies a fair deal and they have average to strong participation in the networks: 5 of the 6 groups (83%) are active in at least one network. 4 of 6 groups (66%) are active in a second and third network.

Of the 5 groups active in a first network, 2 (40%) have been involved for 1-3 years, 1 (20%) has been involved for 6-10 years, and 2 (40%) have been involved for 10 years or more. For groups active in a second network, of 4 reporting groups, 1 (25%) has been involved for 1-3 years, 2 (50%) have been involved for 4-6 years and 1 (25%) has been involved for 10 years or more. For groups involved in a third network, 3 of 4 groups (75%) have been involved for less than a year, while 1 of 4 (25%) has been involved for 6-10 years.

All 6 groups have average to very active participation in all 3 networks.

The majority of groups find their network connections useful: 4 out of 5 groups (80%) naming a first network, 4 out of 4 groups (100%) naming a second network, and 3 out of 4 groups (75%) naming a third network.

ANNEX XVI

IN THE KNOW - Regional Profiles

REGION: All of Québec
32 of 290 respondents work in “All of Québec”.
Survey completed in years 1 and 2 (2009, 2010).

Of the groups indicating that they serve “All of Québec”, the majority (25 groups) are located in the
Montréal region.

Mostly directors/ coordinators answered the survey: of 30 respondents, 22 (73.3%) are the director/ coordinators of the group. 5 respondents are board members, while 2 are staff and 1 is a volunteer.

Organizational Profile

A variety of sectors of work are represented; families and the unemployed are the primary populations served: of 26 reporting groups, 7 (26.9%) work primarily in the Health and Social Services sector, while 5 (19.2%) work in Education. 4 (15.4%) work primarily in each of the following sectors: Arts and Immigration and Cultural Communities. Of 19 reporting groups, 5 (26.3%) work primarily with families while 3 (15.8%) work with youth. 2 groups (10.5%) work with each of the following populations: women and people with mental health problems. Other populations served include people with disabilities, unemployed people and men (1 group each).

Small groups with some strong volunteer participation; medium to lengthy existence: of 32 reporting groups, 28 groups (87.5%) have between 1-5 full-time employees, while 16 of 25 groups (64%) have 1-5 part-time employees. 10 of 30 reporting groups (33.3%) have between 20-50 volunteers.

Of 32 reporting groups, 7 groups (21.8%) have existed between 2-5 years, 6 (18.8%) have been in existence for 6-10 years and 19 groups (59.3%) have existed for 11 years or more.

All groups are not-for-profit and more than half have charitable status: all 32 groups are not-for-profit, and 19 of 32 (59%) have charitable status.

Language

Groups are quite bilingual but overall more English-speaking; they function well in both languages: of 32 reporting groups, 14 (43.7%) work primarily in both English and French, while 11 (34%) function primarily in English and 6 (18.5%) function primarily French. Of 31 reporting groups, 25 (80.6%) are very able to provide services in English, while 24 of 32 reporting groups (75%) are very able to provide services in French. Of 32 reporting groups, 23 (72%) are very able to read and write in both English and French.
Funding

Groups have many sources of non-Government of Québec funding: of 29 reporting groups, 21 (72.4%) receive funding from in-kind support, of 28 reporting groups, 20 (71.4%) receive funding from the federal government, while 21 of 30 reporting groups (70%) have funding from independent fundraising. 15 of 25 groups (60%) receive funding from fees from products or services.

The majority of groups do not receive either project or global mission funding from the Québec government: 14 of 32 groups (44%) receive project funding from the Québec government, while 18 of 32 do not receive this type of funding (56%). While 11 out of 32 groups (34%) receive global mission funding, 19 groups (59%) do not receive it and 2 (6.2%) answered that they did not know.

Networks

Groups are active in networks; averagely or very active for varied lengths of time. A large majority finds the connections useful: of 32 reporting groups, 26 (81%) named one network, 18 (56%) named two networks and 15 (47%) named three networks.

Of 21 (first network) and 17 (second network) reporting groups, 15 (65.2%) and 14 (82.4%) groups respectively have been involved for more than 4 years. 11 out of 13 groups (84.6%) naming a third network have been involved from 1-6 years.

Most groups are averagely to very active: 21 out of 23 (91.3%) reporting groups for the first network, 15 out of 17 (88.2%) reporting groups for the second network, and 11 out of 13 (84.6%) for the third network.

Most groups find the network connections useful: 18 out of 23 (78.3%) for the first network, 13 out of 17 (76.4%) for the second network and 10 out of 13 (76.9%). for the third network.

ANNEX XVII

INFO SHEET: GOVERNMENT OF Québec GLOBAL MISSION FUNDING IN RELATION TO OTHER VARIABLES

1. Global mission funding and other sources of funding: summary

Québec government global mission funding, or core funding, covers the salaries, rent and basic activities of an organization to help it fulfill its mandate. It is recurring and therefore represents a relatively secure and desired source of funding for community groups (Scott, 2003).

Of 243 groups reporting, 98 (40.3%) receive global mission funding. 128 groups (52.7%) answered “No” to this question and 17 groups did not know.

Québec government service or project funding is provided to finance a specific service or project, often for a limited mandate and duration. This type of funding is often granted according to specific government mandates that do not necessarily correspond to community needs.

Of 245 groups reporting, 134 (54.7%) receive project or service funding from the Québec government. 111 groups (45.3%) do not.

Groups also receive funding from a variety of sources other than from the Government of Québec. These include funding from the federal government, in-kind support and foundations. See Table I for full summary.

Table I. Funding other than from the Government of Québec

<table>

<td>115/210</td>
<td>54.8</td>
</tr>
</tbody>
</table>

Overall, a higher percentage of groups receive Government of Québec project/service funding or sources of funding other than from the Québec government (see Table I) than Government of Québec global mission funding. However, in some instances, results may be misleading: sources of funding such as in-kind support and independent fundraising may not, in fact, account for a large percentage of a group’s overall budget.
2. Certain groups receive both project/service funding and global mission funding

79 groups receive both project/service funding and global mission funding from the Québec government. Half of these groups are located in Montréal (40 groups or 50.6%), and mostly use either French (29 groups or 36.7%) or French and English (24 groups or 30.4%) as primary language(s) at work. Having both these sources of funding means the groups are in a more secure financial situation than those that don’t receive both, as they have both a recurring source of core funding and funding for specific projects/services. Global mission funding also allows groups a certain agency in deciding how to use this allocation of funds within their organizations.

3. Certain groups receive funding from sources other than the Government of Québec as well as Québec government global mission funding

Between 43 and 69 groups receive both sources of funding: other than from the Québec government and Québec government global mission funding. For example, 69 groups receive both federal government funding and global mission funding. See Table II for full details.

Table II. Groups receiving funding other than from the Québec government and Québec government global mission funding

<td>62</td>
<td>53.9</td>
</tr>
</tbody>
</table>

Once again, groups that receive both are in a more secure financial situation, as they have access to recurring, core funding and these other sources of funding. These other sources of funding can act as a supplement to global mission funding and support specific mandates, such as the Canada Summer Jobs, Youth Employment Strategy (YES) program sponsored by Human Resources Development Canada (HRDC) which hires university students over the summer.

4. Global mission funding in the regions

At a regional level, there is a wide discrepancy between the regions as to which ones receive global mission funding and which ones do not. The following regions receive no or very little global mission funding:
In the Know: Identifying multiple aspects of Québec’s community sector

- Abitibi-Témiscamingue: neither of the 2 reporting groups receive this funding
- Iles-de-la-Madeleine: 5 out of 6 reporting groups or 83.3% do not receive this funding
- Gaspésie: 4 out of 5 reporting groups or 80% do not receive this funding

On the other hand, a high percentage of Montérégie groups (6 out of 7 groups or 85.7%) and Laval groups (13 out of 17 groups or 76.5%) receive global mission funding.

It is interesting to note that both the Montérégie and Laval regions are represented by a high percentage of French-speaking groups. However, in the Capitale Nationale, only 2 out of 10 reporting groups (20%) receive global mission funding and this is also a region with a high percentage of French-speaking groups. The majority of Capitale Nationale groups, however, even though they function primarily in French, are run by and serve ethno-cultural communities.

In the Montréal region, 51 out of 127 reporting groups (40.2%) receive global mission funding.

5. Global mission funding and language

Of those groups receiving global mission funding and reporting on the primary language used at work (97 groups):

- 36 groups (37.1%) use French as the primary working language
- 30 groups use both French and English (31.0%)
- 27 groups use English as the primary work language (27.8%)

Primary language of work seems to have some impact on global mission funding, with a higher percentage of those groups using French – either as a primary language or in addition to English (66 groups or 68.0%) – receiving global mission funding in comparison to 27.8% (27 groups) using only English as a primary language at work.

It is obvious that groups depend on a wide variety of funding sources, and that global mission funding is an important part of the funding, even though less groups receive it than project/service funding or sources of funding other than from the Québec government. Some of these other sources of funding, however, such as in-kind support or fundraising, may account for a negligible percentage of a group’s overall budget.

A number of groups receive both project service funding and global mission funding (97 groups) or sources of funding other than from the Québec government and global mission funding (between 43 and 69 groups depending on the type of funding). These groups are in a more secure financial situation as they rely both on a recurring source of funding and funding that supports specific projects or mandates.

At the regional level, there appears to be much discrepancy in terms of which regions receive global mission funding and which do not. Language seems to be an important factor in receiving global mission funding, with a higher percentage of Francophone (or bilingual) groups/regions receiving global mission funding. However, even though some groups operate primarily in French, it appears that if they are run by and serve ethno-cultural communities (as in the case of the Capitale Nationale region), a much smaller percentage of them receive global funding. A more in-depth investigation into the regional differences regarding global mission funding may reveal other reasons that groups do or do not receive this type of funding.
ANNEX XVIII

CRITERIA TO RECEIVE GLOBAL MISSION FUNDING (SUMMARY)

Group must meet the definition of a community organization - as defined by the Québec government

• Group cannot be a foundation whose main purpose is to collect and distribute funds (i.e. family or community foundation).
• Group cannot be a religious organization promoting specific religious beliefs (i.e. Church group, synagogue, mosque).
• Group cannot be an association of professionals (i.e. Association of professional basket weavers).
• Group cannot be a political organization? (i.e. Young Anarchists of Québec).
• Group cannot be a local or chapter of a union.

The Government of Québec’s Criteria for funding community groups

• Group must be community based, meaning it works with the community, for the community.
• Group must have an active associative and democratic life, meaning it actively engages with its members and offers opportunities for widespread involvement as well as clear routes for participation such as an annual general assembly, and an active board of directors.
• Group must maintain its autonomy from government and other groups, meaning all members of the board come from the membership and the group is free to make its own autonomous decisions without being subject to rules from a professional order or government bodies.

The Government of Québec’s Criteria for funding autonomous community action groups

• Group must have been founded as a grassroots initiative, meaning citizens organized together around an issue of concern.
• The mission of the group must be to work towards social change, meaning the group decided without government intervention, what kind of action to take towards social transformation and the group shows it can meet the needs of the community and work towards individual and group empowerment.
• Group must have a global approach to the issue of concern, meaning it uses a variety of practices to address the issues (services that address the root of the problem, education, mobilizing concerned people, advocacy etc.), and works with other groups to accomplish its goals.
• Group must be guided by a board of directors from the public at large, meaning there are no structural links to government networks.
INFO SHEET: ETHNO-CULTURAL GROUPS AND GLOBAL MISSION FUNDING

Of the groups participating in the study, 95 of 280 reporting groups (33.9%) have the ability to function in a language other than English or French. They speak Spanish (36 groups), South Asian languages (22 groups), Arabic (13 groups), Filipino dialects (10 groups) or Creole (9 groups). Table I shows the regions these groups are located in.

This finding speaks to the rich diversity of languages community work is being carried out in within specific regions of Québec.

Of particular interest are the findings on groups that have the ability to function in languages other than English and/or French and are ethno-cultural groups. Ethno-cultural groups are defined as groups working with a specific ethno or cultural community such as the black English community or the Chinese community. These groups appear to have a specific challenge when it comes to obtaining global mission funding.

Of the 76 groups that do not have global mission funding, but appear to meet the criteria, 30 work with ethno-cultural communities. This finding was noted when we reviewed the mission statement, populations worked with and sector of activity of these 76 groups to see what might be different about them from groups receiving global mission funding. We categorized groups as ethno-cultural if they mentioned working with a particular ethno-cultural group that offers support or services to immigrants or newcomers in general or to the English-speaking community. These 30 groups work primarily with the black English-speaking community, people from English-speaking Africa, Asia and South Asia, and diverse Spanish-speaking communities. Many of these groups provide front line services that respond to specific needs of their community members: parenting skills, job training, integration support, etc.
There are many reasons why ethno-cultural groups have difficulty in accessing global mission funding

To receive funding from the Ministry of Immigration and Cultural Communities, groups must work towards the integration of their community members into Québec society (with a 5 year span for integration to have been achieved). Given that these groups often work towards integration of their community members over a longer period of time, there appears to be no funding envelope for these groups within the well-developed Government of Québec community funding envelopes. These groups have not accessed global mission funding, despite the fact that they meet the criteria of the Politique\(^2\); the elimination of poverty and exclusion, social development and an active citizenship (Gouvernement du Québec, 2001) and appear to meet the criteria for global mission funding.

There may be several reasons for this. Firstly, many ethno-cultural groups, while working on integration of their members into Québec society, do this work implicitly. Their explicit mandate is parenting, youth activities, information and referral among other activities. This means they cannot access global funding from the Ministry of Immigration and Cultural Communities as they do not have the explicit mandate of integration into Québec society (within a five year period). Secondly, many of these groups cover multiple needs of their members, hence finding a home ministry becomes more difficult.

Not being able to access global funding may also be linked to how these groups describe their work. In our analysis of the first two years of the research, the word ‘integration’ was used twice as often in mission statements of groups with global mission funding (and working with ethno-cultural communities) compared to groups working with ethno-cultural communities and not receiving global mission funding. While groups need to be careful about not falling into ‘mission drift’ to obtain funding (Scott, 2003), it appears that groups working with specific ethno-cultural communities have modified their mission statement to be able to receive funding (White et al, 2008, p. 89).

This concern about having access to global mission funding and how groups describe their work is also corroborated by RIOCM (2008). This study on how to promote stronger inclusion of cultural communities in RIOCM’s work identified the difficulty ethno-cultural groups have finding funding particularly because many funders are not willing to fund specific populations (p. 18).

This lack of funding envelopes for these groups is problematic and needs to be rectified for the Politique to be able to be considered successful and exemplary of good state funding for the community sector.

---

1  During the research COCo began testing the term racialized groups to describe ethno-cultural groups as we felt racialized is more appropriate term. However, when using the word in English and particularly in French, we met with resistance and a lack of understanding of the work. Hence, for now we are using the term ethno-cultural.

2  Politique de reconnaissance et de soutien à l’action communautaire - commonly known as the Politique - a policy whose main objective is to provide recognition and financial support to the community sector as of 2001 (Government of Québec, 2001).
INFO SHEET: NETWORK PARTICIPATION ANALYSIS

A detailed analysis was carried out to determine with what type of networks groups are involved. The research was interested in looking at what networks groups belong to because formal networks with the Québec community sector are a strong component for connections between the government and community groups. Networks were defined as:

a) Local: examples are municipality or borough based youth, seniors ‘tables’: ‘table’ being a place where groups working with similar citizens or on similar issues meet to share information and strategize together;

b) Regional: similar groups that meet at the more regional level i.e.: south-west of Montréal, Laval, Lower Laurentiens;

c) Québec-wide: often known as regroupments or coalitions of groups with similar interests and often funded by the same Government of Québec funding body;

d) Pan-Canadian: places groups come together with groups with similar interests from across Canada (for example: Boys and Girls Clubs of Canada, Canadian AIDS Society, Canadian council for Refugees);

e) English networks such as QCGN, CHSSN, Literacy Volunteers of Québec (SEE ANNEX XXI FOR A LIST OF ACRONYMS AND DEFINITIONS)

Groups were asked if they were involved in networks and to name their three most important network affiliations. While some groups belong to one network only, most groups indicated belonging to two or three networks. A total of 357 networks were named. Of these:

✓ 226 networks were named by groups as a first choice
✓ 127 networks were named by groups as a second choice
✓ 84 networks were named by groups as a third choice

See Table I for a full analysis of network affiliations.

</table>
What are these findings telling us?

✓ This is pleasantly surprising to see the high number of groups that belong to a network. Although there has been no data of participation of these groups in networks in the past, our understanding of past participation suggests there has been a rise in participation in networks in recent years. This is possibly due to funder requirements (or encouragements): the increase in networks and the role networks play in connecting groups to funding sources.

✓ There is more participation in regional networks (158 regional networks identified by groups) than in local (67) or Québec-wide (73). This was interesting to note. We had thought local participation rates would have been higher. However, it may be that in some regions (e.g. Laval) there is little in the way of local networks and most of the networking takes place at the regional level.

✓ Participation in English-speaking networks is high (mentioned 97 times), second only to participation in regional networks. Highest mentioned: QCGN 16, CHSSN 8, CLC 6, ELAN 6, CEDEC 4, Townshippers Association 4, QDF 3, QAHN 3 (*SEE ANNEX XXI FOR A LIST OF ACRONYMS AND DEFINITIONS).

✓ 42 examples of pan-Canadian networks are given. They cover a wide variety of organizations that link specifically to the mandate of the group that filled in the survey. For example: Movement for Canadian Literacy, Canadian Environmental Network, Fédération des Associations Vietnamiennes au Canada.

✓ 34 organizations that are not networks in the sense that COCo identifies networks, were named as networks by survey participants. Some of these 34 organizations are local community organizations (eg. Dawson Community Centre, Project Genesis) and some of these are government-related bodies (for example: Québec en Forme, MRC Laurentides). Other types of networks named included gatherings of clergy, school committees, etc. There appear to be different understandings of what is a network among survey respondents.

It is encouraging to see the number of networks groups named. Most groups are networking with others and connected to the broader community sector in some way.

However, the level of participation in Québec-wide networks is more than 50% lower than in regional networks. This is understandable given the importance of participating in networks ‘close to home’. However, if groups want to have input on policy issues, participating at the Québec-wide level becomes more important as this is the level of networking at which broader policy discussions and stronger linking directly with the government occurs. Groups need to be encouraged to step forward and take positions in Québec-wide networks.
ANNEX XXI

LIST OF ACRONYMS AND DEFINITIONS

**CBAR** – A term to designate a specific type of research: community-based action research (CBAR), which is designed to have as a research priority the needs of the community and includes the participation from all stakeholders (community groups, community members, funders, academics etc.) at each step of the research process: defining the research question and goals, survey design or interview questions, focus groups, feedback on findings and analysis and dissemination of the results. It also emphasizes taking specific action as a result of the research findings to better serve the community.

**CHSSN** – Community Health and Social Services Network. CHSSN is the network of community organizations, resources and public institutions striving to ensure access to health and social services in English for Québec’s English-speaking communities. [http://www.chssn.org/](http://www.chssn.org/)

**CLC** – Community Learning Centres. An English minority language initiative, Community Learning Centres are partnerships that provide a range of services and activities, often beyond the school day, to help meet the needs of learners, their families, and the wider community. Their aim is to support the holistic development of citizens and communities. [http://www.learnQuebec.ca/en/content/clc/](http://www.learnQuebec.ca/en/content/clc/)

**COCO** – Centre for Community Organizations. A Montréal-based non-profit organization that serves English-speaking, bilingual and ethno-cultural community groups across Québec. COCo promotes social justice, active citizenship and just socio-economic development by encouraging healthy community groups in Québec. [http://www.coco-net.org/](http://www.coco-net.org/)

**CQRHC** – Conseil québécois des ressources humaines en culture. A Québec-wide network that seeks to support and promote professional development in the arts sector. [http://www.cqrhc.com/](http://www.cqrhc.com/)
**ELAN** – English Language Arts Network. As an artists’ network, ELAN helps artists share resources, ideas and inspiration across all disciplines. http://www.Québec-elan.org/

**QAAL** – Québec Association for Adult Learning. QAAL promotes equality of access to learning, to support one another as adult educators, to raise public awareness of adult learning issues and to promote the exchange of information and resources. http://www.chssn.org/WebSite/qaal/

**QAHN** – Québec Anglophone Heritage Network. QAHN aims to advance knowledge of the history of Québec’s English-speaking communities by informing, inspiring and connecting people through its activities. Membership is open to anyone with an interest in Québec history, heritage and culture. http://qahn.org/

**QCGN** – Québec Community Groups Network. QCGN is a not-for-profit organization bringing together 38 English-language community organizations across Québec. http://www.qcgn.ca/

**RIOCM** – Regroupement Intersectoriel des Organismes Communautaires de Montréal. A network of 600 community organizations working in the Health and Social Services sector in the Montréal region. http://riocm.ca/

**SACA** - Secretariat à l’Action Communautaire Autonome. Québec government body created to ensure the recognition and support of the community sector in Québec. Predecessor to SACAIS.

**SACAIS** - Secrétariat à l’Action Communautaire Autonome et aux Initiatives Sociales. Québec government body created to ensure the recognition and support of the community sector in Québec, primarily through assuring global mission funding to organizations.

**Townshippers Association** - A non-profit organization that promotes the interests of English-speaking citizens in Québec’s Eastern Townships. www.townshippers.qc.ca/
